Report of the directors

For the year ended 31 December 2023

REPORT OF THE DIRECTORS

The Directors have the pleasure of presenting the consolidated and separate financial statements of the Group and Company for the year ended 31 December 2023.

CORPORATE STRUCTURE AND BUSINESS

Principal activity and business review

Nigerian National Petroleum Company Limited (NNPCL) was incorporated in Nigeria on 21st September 2021 as a limited liability company under the Companies and Allied Matters Act (CAMA) as required by the Petroleum Industry Act (PIA) of 2021. The Company is situated at NNPC Towers, Herbert Macaulay Way, Central Business District, Federal Capital Territory, Abuja and is domiciled in Nigeria. It is established to engage in all commercial activities relating to the petroleum industry.

General duties of the Company

The Company is charged under Section 64 of the PIA to:

- (a) Carry out petroleum operations on a commercial basis, comparable to private companies in Nigeria carrying out similar activities.
- (b) Concessionaire of all Production Sharing Contracts (PSC), Profit Sharing and Risks Service Contracts as the National Oil Company on behalf of the Federation.
- (c) Lift and sell royalty oil and tax oil on behalf of the Nigerian Upstream Petroleum Regulatory Commission (NUPRC) and Federal Inland Revenue Service (FIRS) respectively for an agreed commercial fee.
- (d) Carry out the management of PSCs for a fee based on the profit oil and profit gas lifted and sold.
- (e) Carry out test marketing to ascertain the value of crude oil and report to the Commission.
- (f) Assume the working interest of NNPC (corporation) in respect of any Joint Operating Agreement it was party to.
- (g) Engage in the business of renewables and other energy investments.
- (h) Promote the domestic use of natural gas through development and operation of large-scale gas utilisation industries.
- (i) Engage in activities that ensure national energy security in an efficient manner in the overall interest of the federation.
- (j) Serve as a supplier of last resort for security reasons and all cost shall be for the account of the Federation.

Commencement of operation

The Company commenced full operation effective 1st July 2022.

State of affairs

In the opinion of the Directors, the state of the Company's affairs is satisfactory.

Consolidated and Separate Financial Statements

Report of the directors

For the year ended 31 December 2023

Property, plant and equipment

Information relating to changes in property, plant and equipment during the period is given in Note 19 to the consolidated and separate financial statements. In the opinion of the Directors, the market value of the Company's property, plant and equipment is not less than the carrying value shown in the consolidated and separate financial statements.

Board Members

The names of the board members at the date of this report and of those who held office during the financial year are as stated in Page 3 of these consolidated and separate financial statements.

Contracts

None of the Directors has notified the Group of any interest in contracts made with the Group during the year under review.

Going concern

Nothing has come to the attention of the directors to indicate that the Company will not remain a going concern for at least twelve months from the date of these financial statements. At this time, no significant events after the reporting date that may have an impact on going concern have been noted.

Donations

The Group and Company during the period donated a total sum of №19 billion and №11 billion (2022: Group №1.3 billion and Company №314 million) respectively to various charitable organizations, higher education institutions and other organization during the year ended 31 December 2023 (See below and Note 11).

No donation was made to any political party during the year.

Employment and employees

Employment of physically challenged persons:

The Company has a non-discriminatory policy on recruitment. Applications would always be welcomed from suitably qualified physically challenged persons and are reviewed strictly on qualification. The Company's policy is that the highest qualified and most experienced persons are recruited for appropriate job levels irrespective of an applicant's state of origin, ethnicity, religion or physical condition.

Health, safety and welfare of employees:

Health and safety regulations are enforced within the Company's premises and sites, and employees are aware of existing regulations.

Employee involvement and training:

The Directors maintain regular communication and consultation with the employees on matters affecting employees and the Company. There is great emphasis on staff development and training through carefully planned training courses and seminars to update the special skills and job requirements of the staff throughout the Company.

Auditors

PricewaterhouseCoopers, SIAO Partners and Muhtari Dangana&Co have indicated their willingness to continue in office as joint auditors The Company.

BY ORDER OF THE BOARD:

Nigerian National Petroleum Company Limited **Consolidated and Separate Financial Statements** Statement of directors' responsibilities For the year ended 31 December 2023

Section 377 of the Companies and Allied Matter Acts (CAMA) as amended requires the Directors to prepare financial statements for each financial year that give a true and fair view of the state of financial affairs of the company at the end of the year and of its profit or loss.

The responsibilities include ensuring that:

- keeps proper accounting records that disclose, with reasonable accuracy, the financial position of the Company and comply with the requirements of Section 374 of the Act;
- establishes adequate internal controls to safeguard its assets and to prevent and detect fraud and other irregularities; and
- prepares its financial statements in compliance with the requirement of the Act as to the form and content and using suitable accounting c) policies supported by reasonable and prudent judgments and estimates, and are consistently applied.

The Directors accept responsibility for the annual financial statements, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgments and estimates, in conformity with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standard Board (IASB) and the requirements of Companies and Allied Matters Act (CAMA) No. 3, and in compliance with the Financial Reporting Council of Nigeria (Amendment) Act, No. 6.

The Directors are of the opinion that the consolidated and separate financial statements give a true and fair view of the state of the financial affairs of the Company and of its profit for the year ended 31 December 2023. The Directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of the consolidated and separate financial statements, as well as adequate systems of internal financial control.

Nigerian National Petroleum Company Limited Consolidated and Separate Financial statements Statement of corporate responsibility For the year ended 31 December 2023

Pursuant to the provision of Section. 405 of the Companies and Allied Matters Act, we have reviewed the audited financial statements of the Group for the year ended 31 December, 2023 and based on our knowledge confirm as follows:

- The Company keeps proper accounting records that disclose, with reasonable accuracy, the financial position of the Group and comply with the requirements of the Companies and Allied Matters Act;
- ii The audited financial statements and all other financial information included in the statements fairly present, in all material respects, the financial condition and results of operation of the Company as of and for the year ended 31 December, 2023.
- The Company's internal controls has been designed to ensure that all material information relating to the Company and its subsidiaries is received and provided to the Auditors in the course of the audit.
- iv The Company's internal controls are effective and has remained so within the period of 90 days prior to the date of the audited financial statements.
- v That we have disclosed to the company's Auditors and the Audit Committee the following information:
 - a) there are no significant deficiencies in the design or operation of the Company's internal controls which could adversely affect the company's ability to record, process, summarise and report financial data, and have discussed with the Company's auditors any weaknesses in internal controls observed in the cause of the Audit,
 - b) there is no fraud involving management or other employees which could have any significant role in the Company's internal control.

The Directors are of the opinion that the financial statements give a true and fair view of the state of the financial affairs of the Group and of its profit or loss. The Directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of financial statements, as well as adequate systems of internal financial control.

Independent joint auditors' report

To the Members of Nigerian National Petroleum Company Limited

Report on the audit of the consolidated and separate financial statements

Our opinion

In our opinion, the consolidated and separate financial statements give a true and fair view of the consolidated and separate financial position of Nigerian National Petroleum Company Limited ("the company") and its subsidiaries (together "the group") as at 31 December 2023, and of their consolidated and separate financial performance and their consolidated and separate cash flows for the year then ended in accordance with international financial reporting standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards") and the requirements of the Companies and Allied Matters Act and the Financial Reporting Council of Nigeria (Amendment) Act, 2023.

What we have audited

Nigerian National Petroleum Company Limited's consolidated and separate financial statements comprise:

- the consolidated and separate statements of profit or loss for the year ended 31 December 2023;
- the consolidated and separate statements of other comprehensive income for the year then ended;
- the consolidated and separate statements of financial position as at 31 December 2023;
- the consolidated and separate statements of changes in equity for the year then ended;
- the consolidated and separate statements of cash flows for the year then ended; and
- the notes to the consolidated and separate financial statements, which include a summary of material accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the consolidated and separate financial statements section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards), i.e. the IESBA Code issued by the International Ethics Standards Board for Accountants. We have fulfilled our other ethical responsibilities in accordance with the IESBA Code.

Other information

The directors are responsible for the other information. The other information comprises the Corporate information, Report of the directors, Statement of directors' responsibilities, Statement of corporate responsibility, Statements of value added – Group and Company, Two-year financial summary – Group and Company, but does not include the consolidated and separate financial statements and our auditor's report thereon.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors and those charged with governance for the consolidated and separate financial statements

The directors are responsible for the preparation of the consolidated and separate financial statements that give a true and fair view in accordance with IFRS Accounting Standards and the requirements of the Companies and Allied Matters Act, the Financial Reporting Council of Nigeria (Amendment) Act, 2023, and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's responsibilities for the audit of the consolidated and separate financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

• Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
 are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness
 of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business
 activities within the Group to express an opinion on the consolidated and separate financial statements. We
 are responsible for the direction, supervision and performance of the group audit. We remain solely
 responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

The Companies and Allied Matters Act requires that in carrying out our audit we consider and report to you on the following matters. We confirm that:

- we have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;
- ii) the company has kept proper books of account, so far as appears from our examination of those books and returns adequate for our audit have been received from locations not visited by us;
- iii) the company's statement of financial position, statement of profit or loss and statement of other comprehensive income are in agreement with the books of account and returns.

Nigerian National Petroleum Company Limited Notes to the Consolidated and Separate Financial Statements For the year ended 31 December 2023

1 Corporate information

The Nigerian National Petroleum Company Limited (NNPCL) is Nigeria's national oil company incorporated on September 21, 2021 as a limited liability company under the Company's and Allied Matters Act (2020) with the passage of the Petroleum Industry Act (the "Act", the "PIA"). On 1 July 2022, the Company took over the assets and liabilities of Nigerian National Petroleum Corporation (NNPC) and all the interest of the Nigerian Government in the Joint Venture Assets, as provided by section 54 of the Act and started operations as a full-fledge limited liability company on the same date.

The PIA established NNPCL to carry out petroleum operations on a commercial basis which includes oil and gas exploration, production, refining, transportation and product marketing activities. The Act empowered NNPCL to assume the working interest of the Federation in all Joint Operating Agreements (JOAs). NNPCL also assumed the role of concessionaire of all production sharing contracts (PSCs), profit sharing contract and risk sharing contracts on behalf of the Federation.

The NNPC Towers in Abuja is the headquarters of NNPC Limited. Consisting of four identical towers, the complex is located on Herbert Macaulay Way, Central Business District Abuja. NNPCL has an international office located in London, United Kingdom. The Group consists of NNPC Limited (the Parent Company) and several Subsidiaries/Business Units (BUs) - See note 4.

1.1 Statement of compliance with IFRS

The consolidated financial statements of Nigerian National Petroleum Company Limited (NNPCL) and its subsidiaries (The Group) have been prepared in compliance with the Companies and Allied Matters Act (CAMA), the Financial Reporting Council of Nigeria Act, and the IFRS Accounting Standards, including International Accounting Standards (IAS) and interpretations issued by the IFRS Interpretations Committee (IFRSIC). Further standards may be issued by the International Accounting Standards Board (IASB) and may be subject to interpretations issued by the IFRSIC.

The financial statements comprise the consolidated and separate statements of profit or loss, the consolidated and separate statements of other comprehensive income, the consolidated and separate statements of financial position, the consolidated and separate statements of changes in equity, the consolidated and separate statement of cash flows and the notes to the financial statements.

The consolidated and separate financial statements are presented in Nigerian Naira and all values are rounded to the nearest million (N'000,000) except when otherwise indicated.

1.2 Basis of preparation

The financial statements have been prepared under the going concern assumption and historical cost convention except for the following items:

- Non-derivative financial instruments initially at fair value and subsequently at amortised cost using effective interest rate.
- Inventory lower of cost and net realisable value.
- · Lease liabilities- measured at present value of future lease payments.
- Defined benefits plan assets measured at fair value.
- Defined benefits liabilities measured at fair value.
- Financial assets measured at fair value through other comprehensive income measured at fair value.
- Decommissioning liabilities measured at the present value of the expected future cash flows that will be required to perform the site reclamation.

Historical cost is generally based on the fair value of the consideration given in exchange for assets.

1.3 Going concern

The financial statements have been prepared in accordance with the going concern principle under the historical cost convention. Nothing has come to the attention of the directors to indicate that NNPCL will not remain a going concern for at least twelve months from the date of these financial statements. At this time, no significant events after the reporting date that may have an impact on going concern have been noted.

1.4 Basis of consolidation

i Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control.

The consolidated financial information comprises the financial statements of the Company and its subsidiaries as at 31 December 2023. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

For the year ended 31 December 2023

i Subsidiaries (continued)

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- •The contractual arrangement with the other vote holders of the investee
- •Rights arising from other contractual agreements
- •The Group's voting rights and potential voting rights

ii Business combination

The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises the:

- a) fair values of the assets transferred;
- b) liabilities incurred to the former owners of the acquired business;
- c) equity interests issued by the group;
- d) fair value of any asset or liability resulting from a contingent consideration arrangement, and
- e) fair value of any pre-existing equity interest in the subsidiary.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. The group recognises any non-controlling interest in the acquired entity on an acquisition-by-acquisition basis either at fair value or at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets.

Acquisition-related costs are expensed as incurred.

The excess of the: consideration transferred, amount of any non-controlling interest in the acquired entity, and acquisition-date fair value of any previous equity interest in the acquired entity over the fair value of the net identifiable assets acquired is recorded as goodwill. If those amounts are less than the fair value of the net identifiable assets of the business acquired, the difference is recognised directly in profit or loss as a bargain purchase.

Contingent consideration is classified either as equity or a financial liability. Amounts classified as a financial liability are subsequently remeasured to fair value with changes in fair value recognised in profit or loss.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date. Any gains or losses arising from such remeasurement are recognised in profit or loss.

iii Change in the ownership interest of subsidiary

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interests in the subsidiary. Any difference between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognised in a separate reserve within equity attributable to owners.

When the Group ceases to consolidate or equity account for an investment because of a loss of control, joint control or significant influence, any retained interest in the entity is remeasured to its fair value, with the change in carrying amount recognised in profit or loss. This fair value becomes the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

If the ownership interest in a joint venture or an associate is reduced but joint control or significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income are reclassified to profit or loss where appropriate.

The acquisition method of accounting is used to account for business combinations by the Group.

Non- controlling interests in the results and equity of subsidiaries are shown separately in the consolidated and separate statement of profit or loss and other comprehensive income, statement of changes in equity and statement of financial position respectively.

For the year ended 31 December 2023

Intergroup transactions, balances and unrealized gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

iv Disposal of Subsidiary

If the Group loses control over a subsidiary, it:

- Derecognizes the assets (including goodwill) and liabilities of the subsidiary
- · Derecognizes the carrying amount of any non-controlling interest
- Derecognizes the cumulative translation differences, recorded in equity
- Recognizes the fair value of the consideration received
- Recognizes the fair value of any investment retained
- · Recognizes any surplus or deficit in profit or loss
- Reclassifies the parent's share of components previously recognized in other comprehensive income to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

v Joint arrangements

Under IFRS 11 Joint Arrangements, investments in joint arrangements are classified as either joint operations or joint ventures. The classification depends on the contractual rights and obligations of each investor, rather than the legal structure of the joint arrangement.

Interest in the joint venture is accounted for using the equity method, after initially being recognised at cost in the consolidated statement of financial position. All other joint arrangements of the Group are joint operations. Joint operations are accounted for by recognising the operator's relevant share of assets, liabilities, revenues and expenses.

vi Associates

Associates are all entities over which the Group has significant influence but not control or joint control. This is generally the case where the group holds between 20% and 50% of the voting rights. Investment in associates are accounted for using the equity method of accounting (see (vii) below) after initially being recognised at cost.

vii Equity method

Under the equity method of accounting, the Group's investments are initially recognised at cost and adjusted thereafter to recognise the Group's share of the post-acquisition profits or losses of the investee in profit or loss, and the Group's share of movements in other comprehensive income of the investee in other comprehensive income. Dividends received or receivable from associates and joint ventures are recognised as a reduction in the carrying amount of the investment.

Where the Group's share of loss in an equity accounting investment equals or exceeds its interest in the entity, including any other unsecured long-term receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the other party.

Unrealised gains on transactions between the Group and its associate and joint venture are eliminated to the extent of the Group's interest in the entities. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of equity accounted investees are changed where necessary to ensure consistency with the policies adopted by the Group.

The carrying amount of equity accounted investments is tested for impairment in accordance with the policy described in Note 3.2b.

viii Non-controlling interest

The Group recognises non-controlling interests in an acquired entity either at fair value or at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets. This decision is made on an acquisition-by-acquisition basis.

1.5 Use of estimates and judgements

The preparation of financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of preparation of the financial statements and reported income and expenses for the period. Management reviews these estimates and assumptions on an ongoing basis, by reference to past experience and various other factors considered as reasonable which form the basis for assessing the carrying amount of assets and liabilities. Actual results may differ significantly from these estimates, if different assumptions or circumstances apply. These judgments and estimates are included in Note 3.

For the year ended 31 December 2023

2 Summary of material accounting policies

2.1 New and amended standards adopted by the Group

A number of amended standards became applicable for the current reporting period. The Group did not have to change its accounting policies or make retrospective adjustments as a result of adopting these amended standards.

The Group has applied the following standards and amendments for the first time for their annual reporting period commencing 1 January 2023:

IFRS 17 - Insurance Contracts (effective for reporting periods beginning on or after 1 January 2023)

IFRS 17 was issued in May 2017 as replacement for IFRS 4 Insurance Contracts. It requires a current measurement model where estimates are remeasured in each reporting period. Contracts are measured using the building blocks of discounted probability-weighted cash flows, an explicit risk adjustment, and a contractual service margin (CSM) representing the unearned profit of the contract which is recognised as revenue over the coverage period.

The standard allows a choice between recognising changes in discount rates either in the statement of profit or loss or directly in other comprehensive income. The choice is likely to reflect how insurers account for their financial assets under IFRS 9. The new rules will affect the financial statements and key performance indicators of all entities that issue insurance contracts or investment contracts with discretionary participation features.

Disclosure of accounting policies - Amendments to IAS 1 and IFRS Practice Statement 2

These amendments require entities to disclose their material rather than their significant accounting policies. The amendments define what is 'material accounting policy information' (being information that, when considered together with other information included in an entity's financial statements, can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements) and explain how to identify when accounting policy information is material.

They further clarify that immaterial accounting policy information does not need to be disclosed. If it is disclosed, it should not obscure material accounting information.

Definition of accounting estimates - Amendments to IAS 8

This clarifies how companies should distinguish changes in accounting policies from changes in accounting estimates. The distinction is important, because changes in accounting estimates are applied prospectively to future transactions and other future events, whereas changes in accounting policies are generally applied retrospectively to past transactions and other past events as well as the current period.

Deferred tax related to assets and liabilities arising from a single transaction - Amendments to IAS 12

These amendments require companies to recognise deferred tax on transactions that, on initial recognition, give rise to equal amounts of taxable and deductible temporary differences, and will require the recognition of additional deferred tax assets and liabilities. The amendment should be applied to transactions that occur on or after the beginning of the earliest comparative period presented. In addition, entities should recognise deferred tax assets (to the extent that it is probable that they can be utilised) and deferred tax liabilities at the beginning of the earliest comparative period for all deductible and taxable temporary differences associated with right-of-use assets and lease liabilities, and decommissioning, restoration and similar liabilities, and the corresponding amounts recognised as part of the cost of the related assets.

The cumulative effect of recognising these adjustments is recognised in the opening balance of retained earnings, or another component of equity, as appropriate.

$\textbf{2.2} \ \ New \ standards, amendments \ and \ interpretations \ not \ yet \ adopted$

As at 31 December 2023, certain new accounting standards and interpretations have been published that are not mandatory for 31 December 2023 reporting periods and have not been early adopted by the group. These standards are not expected to have a material impact on the entity in the current or future reporting periods and on foreseeable future transactions.

Non-current liabilities with covenants - Amendments to IAS 1 (effective 1 January 2024)

These amendments clarifies that liabilities are classified as either current or non-current, depending on the rights that exist at the end of the reporting period. Classification is unaffected by the entity's expectations or events after the reporting date (e.g. the receipt of a waiver or a breach of covenant).

The amendments require disclosures if an entity classifies a liability as non-current and that liability is subject to covenants that the entity must comply with within 12 months of the reporting date. The disclosures include the carrying amount of the liability, information about the covenants, and facts and circumstances, if any, that indicate that the entity may have difficulty complying with the covenants.

For the year ended 31 December 2023

2.2 New standards, amendments and interpretations not yet adopted (continued)

Lease liability in a sale and leaseback - Amendments to IFRS 16 (effective 1 January 2024)

These amendments explain how an entity accounts for a sale and leaseback after the date of the transaction. They specify that, in measuring the lease liability subsequent to the sale and leaseback, the seller-lessee determines 'lease payments' and 'revised lease payments' in a way that does not result in the seller-lessee recognising any amount of the gain or loss that relates to the right of use that it retains. This could particularly impact sale and leaseback transactions where the lease payments include variable payments that do not depend on an index or a rate.

Supplier finance arrangements - Amendments to IAS 7 and IFRS 7 (effective 1 January 2024)

The objective of the new disclosures is to provide information about supplier finance arrangments that enables investors to assess the effects on an entity's liabilities, cash flows and the exposure to liquidity risk. The new disclosures include information about the following the carrying amounts of financial liabilities that are part of supplier finance arrangements and the line items in which those liabilities are presented, the carrying amount of the financial liabilities for which suppliers have already received payment from the finance providers, the range of payment due dates for both the financial liabilities that are part of supplier finance arrangements, and comparable trade payables that are not part of such arrangements, non-cash changes in the carrying amounts of financial liabilities and access to supplier finance arrangements facilities and concentration of liquidity risk with finance providers.

Sale or contribution of assets between an investor and its associate or joint venture – Amendments to IFRS 10 and IAS 28

The amendments clarify the accounting treatment for sales or contribution of assets between an investor and their associates or joint ventures. They confirm that the accounting treatment depends on whether the non-monetary assets sold or contributed to an associate or joint venture constitute a 'business' (as defined in IFRS 3 Business Combinations). Where the non-monetary assets constitute a business, the investor will recognise the full gain or loss on the sale or contribution of assets. If the assets do not meet the definition of a business, the gain or loss is recognised by the investor only to the extent of the other investor's interests in the associate or joint venture. The amendments apply prospectively.

General requirements for disclosure of sustainability-related financial information - IFRS S1 (effective 1 January 2024)

This standard includes the core framework for the disclosure of material information about sustainability-related risks and opportunities across an entity's value chain. IFRS S1 requires entities to disclose information about its sustainability-related risks and opportunities that is useful to primary users of general purpose financial reporting in making decisions relating to providing resources to the entity.

Climate-related disclosures - IFRS S2 (effective 1 January 2024)

This is the first thematic standard issued that sets out requirements for entities to disclose information about climate-related risks and opportunities. IFRS S2 requires an entity to identify and disclose climate-related risks and opportunities that could affect the entity's prospects over the short, medium and long term. To achieve this objective, an entity is required to refer to and consider the applicability of industry-based disclosure topics as defined in the Industry-Based Guidance on Implementing IFRS S2.

Lack of Exchangeability - Amendments to IAS 21 (effective 1 January 2025)

An entity is impacted by the amendments when it has a transaction or an operation in a foreign currency that is not exchangeable into another currency at a measurement date for a specified purpose. A currency is exchangeable when there is an ability to obtain the other currency (with a normal administrative delay), and the transaction would take place through a market or exchange mechanism that creates enforceable rights and obligations. These amendments will require companies to apply a consistent approach in assessing whether a currency can be exchanged into another currency and, when it cannot, in determining the exchange rate to use and the disclosures to provide.

NNPCL has assessed the impact of these new standards and determined that the standards are not expected to have a material impact on the entity in the current or future reporting periods and on foreseeable future transactions up to the expected date of cessation. NNPCL does not intend to adopt the amendments before their effective date.

There are no other IFRSs or IFRIC Interpretations that are yet to be effective that would be expected to have a material impact on NNPCL.

2.3 Current versus non-current classification

The Group presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is:

- •Expected to be realised or intended to be sold or consumed in normal operating cycle
- •Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- •Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- •It is held primarily for the purpose of trading
- •It is due to be settled within twelve months after the reporting period, or
- •There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Group classifies all other liabilities as non-current. Deferred tax assets and liabilities are classified as non-current assets and liabilities.

For the year ended 31 December 2023

2.4 Fair value measurement

The Group measures its quoted equities, at fair value at each reporting date. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- •In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows based on the lowest level input that is significant to the fair value measurement as a whole:

- •Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- •Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. The Group's valuation committee determines the policies and procedures for recurring fair value measurement, such as FVTOCI. For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

2.5 Revenue recognition

The Group derives revenue from the sale of crude oil, gas and petroleum products such as Premium Motor Spirit (PMS), Dual Purpose Kerosene (DPK), Automotive Gasoline Oil (AGO) and naphtha, and provision of services such as seismic contracts, time based contracts, gas transmission tariffs, shipping, marine and engineering to its customers. The Group accounts for contracts within the scope of IFRS 15 'Revenue from contracts with customers' when a contract has been approved by both parties, each party's rights have been clearly identified, payment terms have been clearly identified, the contract has commercial substance and it is probable that the Group will collect the consideration it is entitled to for the transfer of crude oil or gas or petroleum products or services to the customer.

The Group recognises revenue when a customer obtains control of the goods which usually occurs when the title is passed, provided that risks and rewards of ownership are assumed by the customer and the customer obtains obligation to pay for the goods or services. This generally occurs when the product is physically transferred into a vessel, pipe or other delivery mechanism. If the consideration includes a variable component, the expected consideration is adjusted for the estimated impact of the variable component at the point of recognition and re-estimated at every reporting period.

Definition of a customer

A customer is a party that has contracted with the Group to obtain crude oil, gas, petroleum products, or services that are an output of the Group's ordinary activities in exchange for consideration. A counter party would not be a customer if it has entered into a contract to share in the risk and benefits that result from the activity or process.

The Group has entered into collaborative arrangements with its joint venture (JV) partners to share in the cost of production of oil and gas as well as other related costs. Oil and gas produced are shared between the partners in the proportion of their participating interest in the joint venture. Joint venture partners do not meet the definition of a customer according to IFRS 15. Revenue or income from these arrangements is therefore recognized separately in other income.

Contract enforceability and termination clauses

The Group recognises revenue for contracts that create enforceable rights and obligations to parties in the contract. IFRS 15 requires that for contracts to be enforceable, it must have been approved by the parties to the contract, rights must be explicitly stated, payment terms must have been defined, the contract must have commercial substance, and collectability must be highly probable. The Group does not recognise revenue for contracts that do not meet the revenue recognition criteria. In such cases, where consideration is received it recognises a contract liability and only recognises revenue when the contract is executed. For sale of crude oil, gas and petroleum products, and services rendered, a contract is enforceable at the inception of the contract.

Nigerian National Petroleum Company Limited Notes to the Consolidated and Separate Financial Statements For the year ended 31 December 2023

Identification of performance obligation

The Group assesses the goods or services promised in a contract with a customer and identifies each promise to deliver distinct goods or services. The Group typically has single performance obligations in its oil, gas and petroleum products sales contracts, which is to transfer crude oil or gas or petroleum products to customers. The performance obligation satisfied upon the transfer of crude oil or gas or petroleum products and payment is generally due within 30 to 90 days for export and domestic sales respectively.

The Group recognises revenue from sale of crude and petroleum products, and services at the point when the performance obligation is satisfied. Natural gas revenue is recognised either at a point in or over time based on the contract.

Transaction price

Transaction price is the amount allocated to the performance obligations identified in the contract. It represents the amount of revenue recognised as those performance obligations are satisfied. Complexities may arise where a contract includes variable consideration, significant financing components or consideration payable to a customer.

Variable consideration not within the Group's control is estimated at the point of revenue recognition and reassessed periodically. The estimated amount is included in the transaction price to the extent that it is highly probable that a significant reversal of the amount of cumulative revenue recognised will not occur, when the uncertainty associated with the variable consideration is subsequently resolved. Where variable considerations are subject to constraints, revenue not subject to a significant reversal in the future periods is recognised as the performance obligation is satisfied.

The Group does not adjust the promised amount of consideration for the effects of a significant financing component when it expects, at contract inception, that the period between when it transfers a promised good or service to a customer and when the customers pays for that goods or services will be less than one year.

Consideration payable to a customer is accounted for as a reduction of the transaction price and, therefore, of revenue unless the payment to the customer is in exchange for a distinct good or service that the customer transfers to the Group. These do not represent a distinct service transferred and are therefore recognised as a direct deduction from revenue.

Breakage

The Group currently operates its gas sales contract on a take or pay basis, with its customers. Under this arrangement, a customer undertakes to make payment for the take or pay quantity, whether it takes delivery or not. Where the customer does not exercise all its contractual rights to receive gas, the Group recognises the estimated breakage amount as revenue in proportion to the pattern of exercised rights. However, where the occurrence of breakage cannot be reliably determined, the Group recognises the breakage as revenue to the extent that the probability of the customer exercising its remaining rights becomes remote.

Contract modification and contract combination

Contract modification is a change in the scope or price (or both) of a contract that is approved by the parties to the contract. The Group determines whether to account for the modification as a new contract or as part of the existing contract.

The Group recognises a modification as a separate contract if the scope is separately identifiable and the transaction price reflects the stand-alone selling price of the performance obligation. Otherwise, the Group recognises modification prospectively (when price does not reflect stand alone selling price) or using the cumulative catch up adjustment method (when scope is not distinct).

The Group combines two or more contracts entered into at or near the same time with the same customer and account for the contracts as a single contract if any of the following criteria are met:

- The contracts are negotiated as a package with a single commercial objective;
- The amount of consideration to be paid in one contract depends on the price or performance of the other contract; or
- The goods or services promised in the contracts (or some goods or services promised in each of the contracts) are a single performance obligation.

Production imbalances

Oil, gas and liquid from Ecravos Gas To Liquid (EGTL) plant lifted and sold by the Group, above or below the Group's participating interests in a joint arrangement, results in over-lifts and under-lifts respectively.

The Group recognizes revenue based on the actual amount of crude oil or gas lifted and sold during the period. Where there is an underlift, if the over-lifter does not meet the definition of a customer and the settlement of the transaction is non-monetary, the under-lift is recognized as other income and a corresponding receivable is recognized. Where there is an over-lift, the Group recognizes the excess volume lifted in it cost of production and a corresponding liability is recognised. The Group measures under-lifts and over-lifts initially at the market price of oil or gas or liquid from EGTL plant at the date of lifting. Over-lifts and under-lifts are measured subsequently at the current market value, with the changes arising from remeasurements recognized in other income or other expense.

Contract assets and liabilities

The Group recognises contract assets where right to consideration from crude oil and gas sales is conditioned on factors other than the passage of time. The Group recognises contract liabilities for consideration received for which a performance obligation has not been met.

For the year ended 31 December 2023

2.6 Under recovery

In line with Section 64(M) of the Petroleum Industry Act (PIA) 2021, the cost incurred by NNPC Limited (Group) as the energy supplier of last resort for energy security reasons, and all associated cost shall be on the account of the Federation. The government instructed that NNPCL cannot sell its Premium Motor Spirit (PMS) above a certain regulated price. However, the cost of importing this PMS is usually much higher than this regulated price. The under recovery is essentially the difference between the actual landing cost of the product and the regulated price. This balance is used to reduce the cost of sales of the Group. The corresponding entry is either used to reduce the liability due to the Federation or used as a receivable from the Federation.

Premium Motor Spirit (PMS) cost under recovery is recognised where there is reasonable assurance that it will be received and all attached conditions has been complied with. When it relates to an expense item, they are deducted in reporting the related expense in cost of sales.

2.7 Taxation

The Company and subsidiaries are subjected to the payment of taxes.

Income taxes

The income tax expense or credit for the period is the tax payable on the current period's taxable income, based on the applicable income tax rate for each jurisdiction, adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the Group and its subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions, where appropriate, on the basis of amounts expected to be paid to the tax authorities.

Taxation on crude oil activities is provided in accordance with the Petroleum Profits Tax Act (PPTA) CAP. P13 Vol. 13 LFN 2004 while gas and other operations are taxed in accordance with the Companies Income Tax Act (CITA) CAP. C21 Vol. 3 1-FN 2004. Education tax is assessed at 2.5 per cent of the assessable profits (3% effective from September 1 2023).

Deferred taxes

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that, at the time of the transaction, affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax liabilities and assets are not recognised for temporary differences between the carrying amount and tax bases of investments in foreign operations where the Group is able to control the timing of the reversal of the temporary differences and it is probable that the differences will not reverse in the foreseeable future.

Deferred tax assets and liabilities are offset where there is a legally enforceable right to offset current tax assets and liabilities and where the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

Uncertainty over income tax treatments

The Group examines where there is an uncertainty regarding the treatment of an item, including taxable profit or loss, the tax bases of assets and liabilities, tax losses and credits and tax rates. It considers each uncertain tax treatment separately or together as a group, depending on which approach better predicts the resolution of the uncertainty. The factors it considers include:

- how it prepares and supports the tax treatment; and
- the approach that it expects the tax authority to take during an examination.

If the Group concludes that it is probable that the tax authority will accept an uncertain tax treatment that has been taken or is expected to be taken on a tax return, it determines the accounting for income taxes consistently with that tax treatment. If it concludes that it is not probable that the treatment will be accepted, it reflects the effect of the uncertainty in its income tax accounting in the period in which that determination is made (for example, by recognising an additional tax liability or applying a higher tax rate).

Nigerian National Petroleum Company Limited Notes to the Consolidated and Separate Financial Statements For the year ended 31 December 2023

The Group measures the impact of the uncertainty using methods that best predicts the resolution of the uncertainty. The Group uses the most likely method where there are two possible outcomes, and the expected value method when there are a range of possible outcomes.

The Group assumes that the tax authority with the right to examine and challenge tax treatments will examine those treatments and have full knowledge of all related information. As a result, it does not consider detection risk in the recognition and measurement of uncertain tax treatments. The Group applies consistent judgements and estimates on current and deferred taxes. Changes in tax laws or the presence of new tax information by the tax authority is treated as a change in estimate in line with IAS 8 - Accounting policies, changes in accounting estimates and errors.

Judgements and estimates made to recognise and measure the effect of uncertain tax treatments are reassessed whenever circumstances change or when there is new information that affects those judgements. New information might include actions by the tax authority, evidence that the tax authority has taken a particular position in connection with a similar item, or the expiry of the tax authority's right to examine a particular tax treatment. The absence of any comment from the tax authority is unlikely to be, in isolation, a change in circumstances or new information that would lead to a change in estimate.

Royalties, resource rent tax and revenue based taxes

In addition to corporate income taxes some of the Group's subsidiaries also recognise taxes on income, other types of taxes on net income which are calculated based on oil and gas production.

Royalties, resource rent taxes and revenue based taxes are accounted for under IAS 12 when they have the characteristics of an income tax. This is considered to be the case when they are imposed under government authority and the amount payable is based on taxable income rather than based on quantity produced or as a percentage of revenue after adjustment for temporary differences. For such arrangements, current and deferred income tax is provided on the same basis as described above for other forms of income tax.

Obligations arising from royalty arrangements and other types of taxes, that do not satisfy these criteria, are recognised as current provisions and included in cost of sales.

2.8 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Internally generated intangible assets, excluding capitalised development costs, are not capitalised. Instead, the related expenditure is recognised in the profit or loss in the period in which the expenditure is incurred.

Following initial recognition, intangible assets with definite lives are carried at cost less any accumulated amortisation (calculated on a straight-line basis over their useful lives) and accumulated impairment losses, if any.

The useful lives of intangible assets are assessed as either finite or indefinite. Intangible assets with finite lives are amortised over the useful economic life on a straight line basis and assessed for impairment whenever there is an indication that the intangible asset may be impaired.

The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the profit or loss in the expense category that is consistent with the function of the intangible assets.

2.8.1 Goodwill

Goodwill is measured as described in note 1.4 (ii). Goodwill on acquisitions of subsidiaries is included in intangible assets. Goodwill is not amortised but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. The units or groups of units are identified at the lowest level at which goodwill is monitored for internal management purposes.

For the year ended 31 December 2023

2.8.2 Mineral acquisition rights

Intangible assets relating to mineral acquisition rights with finite lives are carried at cost, less accumulated amortisation and accumulated impairment losses. Such rights, except for oil and gas mining rights are amortised on a straight line basis over the exploration period and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year end. Intangible asset regarding the crude oil and gas mining rights is amortised upon discovery of commercial quantity of crude oil and gas on a unit-of-production basis over the total proved reserves of the relevant assets.

The average remaining amortisation period for the mineral rights is between 1 year - 19 years.

2.8.3 Research and development

Research costs are charged as expense to profit or loss as incurred.

Development expenses are capitalised when the following can be demonstrated:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale.
- · Its ability to use or sell the intangible asset.

The technical feasibility of the project and the availability of the adequate resources for the completion of the intangible asset:

- The ability of the asset to generate probable future economic benefits;
- The ability to measure reliably the expenditures attributable to the asset; and
- The feasibility and intention of the Group to complete the intangible asset and use or sell it,

Advertising, training and start-up costs are charged as expense to profit or loss as when incurred.

Following initial recognition of the development expenditure as an asset, the asset is carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete and the asset is available for use, It is amortised over the period of expected future benefit. Amortisation is recorded in cost of sales. During the period of development, the asset is tested for impairment annually.

2.9 Oil and natural gas exploration and evaluation, appraisal and development expenditure

The Group applies IFRS 6 'Exploration for and Evaluation of Mineral Resources' for exploration and evaluation costs. Oil and natural gas properties and expenditures; and Exploration and Evaluation assets are accounted for in accordance with the successful effort method of accounting (SEM).

Pre-license costs

Pre-license costs are expensed in the period in which they are incurred.

Exploration license cost

Exploration license costs are capitalised within property, plant and equipment. License costs paid in connection with a right to explore in an existing exploration area are capitalised and amortised on a straight-line basis over the life. The mineral rights has a useful life of 10-60 years, after which it is subject to renewal on its expiration.

License costs are reviewed at each reporting date to confirm that there is no indication that the carrying amount exceeds the recoverable amount. This review includes confirming that exploration drilling is still under way or firmly planned, or that it has been determined, or work is under way to determine that the discovery is economically viable based on a range of technical and commercial considerations and sufficient progress is being made to establish development plans and timing. If no future activity is planned or the license has been relinquished or has expired, the carrying value of the license is written off through profit or loss. The exploration license costs are initially recognised as cost and subsequently amortised on a straight line based on the economic life. They are subsequently carried at cost less accumulated amortisation and impairment losses.

Exploration and evaluation costs

Exploration and evaluation activity involves the search for mineral resources, the determination of technical feasibility and the assessment of commercial viability of an identified resource. Once the legal right to explore has been acquired, costs directly associated with an exploration well are capitalized as exploration and evaluation assets within property, plants and equipment until the drilling of the well is complete and the results have been evaluated. These costs include directly attributable employee remuneration, materials and fuel used, rig costs and payments made to contractors. Geological and geophysical costs are recognized in profit or loss as incurred. If no potentially commercial hydrocarbons are discovered, the exploration asset is written off as a dry hole. If extractable hydrocarbons are found and, subject to further appraisal activity (e.g., the drilling of additional wells), are likely to be capable of being commercially developed, the costs will continue to be carried as property, plants and equipment while sufficient or continued progress is made in assessing the commerciality of the hydrocarbons.

For the year ended 31 December 2023

Costs directly associated with appraisal activity undertaken to determine the size, characteristics and commercial potential of a reservoir following the initial discovery of hydrocarbons, including the costs of appraisal wells where hydrocarbons were not found, are initially capitalized as exploration and evaluation assets within property, plants and equipment. All such capitalized costs are subject to technical, commercial and management review as well as review for indicators of impairment at least once a year. This is to confirm the continued intent to develop or otherwise extract value from the discovery. When this is no longer the case, the costs are written off to profit or loss. When proved reserves of oil and natural gas are identified and development is sanctioned by management, the relevant capitalized expenditure is first assessed for impairment and (if required) any impairment loss is recognized, then the remaining balance is transferred to oil and natural gas properties. No amortization is charged during the exploration and evaluation phase. For exchanges or parts of exchanges that involve only exploration and evaluation assets, the exchange is accounted for at the fair value of the asset received or if not available at the carrying value of the assets given up.

Development expenditures

Expenditure on construction, installation or completion of infrastructure facilities such as platforms, pipelines and the drilling of development wells are capitalised within "assets in progress" in oil and natural gas properties. When development is completed on a specific field, the capitalised amount is transferred to its appropriate class. No depletion or amortisation is charged during the development stage.

Farmouts in the exploration and evaluation phase

The Group does not record any expenditure made by the farmee on its account. It also does not recognise any gain or loss on its exploration and evaluation farm-out arrangements, but re-designates any costs previously capitalised in relation to the whole interest as relating to the partial interest retained. Any cash consideration received directly from the farmee is credited against costs previously capitalised in relation to the proportion of assets farmed out with any excess accounted for by the farmor as a gain on disposal.

The consideration receivable on disposal of an item of property, plant and equipment or an intangible asset is recognized initially at its fair value by the Group. However, if payment for the item is deferred, the consideration received is recognized initially at the cash price equivalent. The difference between the nominal amount of the consideration and the cash price equivalent is recognized as interest income. Any part of the consideration that is receivable in the form of cash is treated as a definition of a financial asset and is accounted for at amortized cost.

Farmouts —outside the exploration and evaluation phase

In accounting for a farmout arrangement, the Group:

- -Derecognises the proportion of the asset that it has sold to the farmee;
- -Recognises the consideration received or receivable from the farmee, which represents the farmee's obligation to fund the capital expenditure in relation to the interest retained by the farmor
- -Recognises a gain or loss on the transaction for the difference between the net disposal proceeds and the carrying amount of the asset disposed of. A gain is only recognised when the value of the consideration can be determined reliably. If not, then the Group accounts for the consideration received as a reduction in the carrying amount of the underlying assets;
- -Tests the retained interests for impairment if the terms of the arrangement indicate that the retained interest may be impaired.

2.10 Property, plant and equipment (including oil and natural gas properties)

Initial recognition

Oil and natural gas properties and other property, plant and equipment are stated at cost, less accumulated depreciation and accumulated impairment losses, excluding land. The initial cost of an asset comprises its purchase price or construction cost, any costs directly attributable to bringing the asset into operation, the initial estimate of any decommissioning obligation, if any, and, for qualifying assets, borrowing costs. The purchase price or construction cost is the aggregate amount paid and the fair value of any other consideration given to acquire the asset.

Depreciation is calculated using the straight-line method of calculation i.e. the cost of the assets less its residual value, if applicable, over the number of useful lives (in years), as follows:

Oil and Natural gas assets	Useful lives
Pipeline/storage depot system	10 - 50 years
Decommissioning cost	Over the total proved reserves.
Oil wells	Unit of production
Refineries	10 - 70 years
Petrochemical plants	10 - 70 years
Modified Carry Arrangements (MCA) Assets	10 - 70 years
Escravos Gas to liquid	10 - 70 years

For the year ended 31 December 2023

Other property, plant and equipment	Useful lives
NNPC Telecom Network Stations	20 - 30 years
Freehold land	Not depreciated
Buildings	20 - 50 years
Automotive equipment	4 - 6 years
Movable equipment	5- 10 years
Furniture and Office Equipment	4 - 6 years
Personnel facilities	6- 10 years
Laboratory apparatus and equipment	5 - 7 years
Electrical plant and transmission	10 - 20 years
Loose tools	value of usage
Right-of-use assets	Useful lives
Buildings	4 vears

The cost of assets built by the Group includes the cost of material and direct labour as well as any other costs directly attributable to bringing the asset to a working condition as intended by management. All disbursements related to the construction or purchase of property, plant and equipment in the stage prior to implementation are considered construction assets in progress which is presented within property, plant and equipment. Once the assets are available for use, they start to be depreciated or amortized.

Construction assets in progress and freehold land are stated at cost. However, these class of assets are not depreciated.

Development and production asset swaps

Exchanges of development and production assets are measured at fair value, unless the exchange transaction lacks commercial substance or the fair value of neither the asset received nor the asset given up is reliably measurable. The cost of the acquired asset is measured at the fair value of the asset given up, unless the fair value of the asset received is more clearly evident. Where fair value is not used, the cost of the acquired asset is measured at the carrying amount of the amount given up. A gain or loss is recognised on the difference between the carrying amount of the asset given up and the fair value of the asset received in the profit or loss.

Major maintenance and repairs (Turn-around Cost)

Expenditure on major maintenance refits or repairs comprises the cost of replacement of assets or parts of assets, inspection costs and overhaul costs. Where an asset or part of an asset that was separately depreciated is replaced and it is probable that future economic benefits associated with the item will flow to the Group, the expenditure is capitalized and the carrying amount of the replaced asset is derecognized. Inspection costs associated with major maintenance programs are capitalized and amortized over the period to the next inspection. Routine maintenance and repairs are charged to expense as incurred. The costs of major turn-around of refineries and large petrochemical units are capitalized as incurred and depreciated over the period of time between two consecutive major turnarounds. Where part of the asset was not separately considered as a component, the replacement value is used to estimate the carrying amount of the replaced assets which is immediately written off. All other maintenance costs are expensed as incurred.

Annual review of depreciation method, residual values and useful lives

Depreciation method, residual values and useful lives of each item of property, plant and equipment are reviewed and, adjusted if appropriate, at least, on an annual basis. The changes, if necessary, in the depreciation method, residual values and useful lives are accounted for prospectively. The carrying amount of property, plant and equipment is reviewed for impairment whenever events or changes in circumstances indicate the carrying value may not be recoverable.

Derecognition of property, plant and equipment

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Upon disposal or retirement of property, plant and equipment, the cost and related accumulated depreciation are removed from the financial statements and any resulting gain or loss is recognised arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the profit or loss in the period in which the item is derecognized.

2.11 Inventories

The Group's inventory is defined as assets held for sale in the ordinary course of business or in the process of production for such sale or in the form of materials or supplies to be consumed in the production process or in the rendering of services. The Group's inventories primarily consist of crude oil, petroleum products and chemicals, oil and natural gas supplies as well as spare parts (items for repairs and maintenance of oil and natural gas properties consumable within one accounting period). Inventories are stated at the lower of cost and net realisable value. Costs of materials and supplies represent purchase or production cost of goods and are determined on a Weighted Average Cost basis (WAC) for material stocks. Crude oil, natural gas and petroleum products are carried at the lower of net realisable value and cost determined under the First-In, First-Out method (FIFO).

For the year ended 31 December 2023

Inventory relating to intermediate products are valued at actual cost plus conversion costs or net realisable value whichever is lower. Costs include directly attributable costs incurred in bringing inventories to the present location and condition for intended use by management. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale. Where the time value of money is material, these future prices and costs to complete are discounted. Net realizable value is determined by reference to prices existing at the reporting date.

2.11.1 Pipeline fill

Crude oil which is necessary to bring a pipeline into working order is treated as a part of the related pipeline on the basis that it is not held for sale or consumed in a production process, but is necessary for the operation of a facility during more than one operating cycle. Also, its cost cannot be recouped through sale (or is significantly impaired). This applies even if the part of inventory that is deemed to be an item of Property, Plant and Equipment (PP&E) cannot be separated physically from the rest of inventory. It is valued at cost and is depreciated over the useful life of related asset.

2.12 Leases

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys a right to control the use of an identified asset for a period of time in exchange for a consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group uses the definition of a lease in IFRS 16.

Group as a lessee

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially recognised at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right of use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Group by the end of the lease term or the cost of the right-of-use asset reflects that the Group will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of the Property, Plant and Equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

At commencement or modification of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Lease payments included in the measurement of the lease liability comprise the following:

- Fixed payments, including in-substance fixed payments;
- -Variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- Amounts expected to be payable under a residual value guarantee; and
- The exercise price under a purchase option that the Group is reasonably certain to exercise, lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Group is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, if the Group changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Group presents right-of-use assets and lease liabilities as a separate line in the statement of financial position. The Group also splits the lease liability into current and non-current portion while the right-of-use is presented as a non-current asset in the statement of financial position.

Right-of-use assets are generally depreciated over the shorter of asset's useful life and lease term on a straight-line basis. If the Group is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life.

Short-term leases and leases of low-value assets

The Group has elected not to recognise right-of-use assets and lease liabilities for leases of low-value assets and short-term leases. Short-term leases are leases with duration of 12 months or less while low value leases are leases that have an asset value of N2.2 million or less. The Group recognises the lease payments associated with these leases as an income (Group as a Lessor) or expense (Group as a Lessee) on a straight-line basis over the lease term.

For the year ended 31 December 2023

2.13 Foreign currency translation

The Group's consolidated financial statements are presented in Naira while the Company's functional currency is the US Dollars (US\$).

Transactions and balances

Transactions in foreign currencies are initially recorded by the Group entities at their respective functional currency spot rates at the date the transaction first qualifies for recognition. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency spot rate of exchange ruling at the reporting date. Differences arising on settlement or translation of monetary items are recognized in profit or loss. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of gain or loss on change in fair value in the item in which case the translation differences on items whose fair value gain or loss is recognized in other comprehensive income or profit or loss are also recognized in other comprehensive income or profit or loss, respectively.

Translation of financial statements denominated in foreign currencies

Assets and liabilities of foreign entities are translated into Naira (the presentation currency) on the basis of the exchange rates at the reporting date. The profit or loss items are translated using the average exchange rates for the period. Assets and liabilities are translated using the closing rates while equity items are translated using historical rates.

Foreign exchange differences resulting from such translations are recorded in other comprehensive income as component of either shareholder's equity under "Foreign currency translation reserve" (for the Group share) or under "Non-controlling interests" (for the share of non-controlling interests) as appropriate.

2.14.1 Non-current assets held for distribution to equity holders of the parent and discontinued operations

The Group classifies non-current assets and disposal groups as held for distribution to equity holders of the parent if their carrying amounts will be recovered principally through a distribution rather than through continuing use. Such non-current assets and disposal groups classified as held for distribution are measured at the lower of their carrying amount and fair value less costs to distribute. Costs to distribute are the incremental costs directly attributable to the distribution, excluding finance costs and income tax expense.

The criteria for held for distribution classification is regarded as met only when the distribution is highly probable and the asset or disposal group is available for immediate distribution in its present condition. Actions required to complete the distribution should indicate that it is unlikely that significant changes to the distribution will be made or that the decision to distribute will be withdrawn. Management must be committed to the distribution expected within one year from the date of the classification.

Property, plant and equipment and intangible assets are not depreciated or amortised once classified as held for distribution.

Assets and liabilities classified as held for distribution are presented separately as current items in the statement of financial position.

A disposal group qualifies as discontinued operation if it is a component of an entity that either has been disposed of, or is classified as held for sale, and:

- •Represents a separate major line of business or geographical area of operations
- •Is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations or
- •Is a subsidiary acquired exclusively with a view to resell.

Discontinued operations are excluded from the results of continuing operations and are presented as a single amount as profit or loss after tax from discontinued operations in the statement of profit or loss.

All the notes to the financial statements include amounts for continuing operations, unless indicated otherwise.

2.14.2 Non-current assets (or disposal groups) held for sale and discontinued operations

Non-current assets (or disposal groups) are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use and a sale is considered highly probable. They are measured at the lower of their carrying amount and fair value less costs to sell, except for assets such as deferred tax assets, assets arising from employee benefits, financial assets and investment property that are carried at fair value and contractual rights under insurance contracts, which are specifically exempt from this requirement.

For the year ended 31 December 2023

An impairment loss is recognised for any initial or subsequent write-down of the asset (or disposal group) to fair value less costs to sell. A gain is recognised for any subsequent increases in fair value less costs to sell of an asset (or disposal group), but not in excess of any cumulative impairment loss previously recognised. A gain or loss not previously recognised by the date of the sale of the non-current asset (or disposal group) is recognised at the date of derecognition.

Non-current assets (including those that are part of a disposal group) are not depreciated or amortised while they are classified as held for sale. Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale continue to be recognised.

Non-current assets classified as held for sale and the assets of a disposal group classified as held for sale are presented separately from the other assets in the balance sheet. The liabilities of a disposal group classified as held for sale are presented separately from other liabilities in the balance sheet.

A discontinued operation is a component of the entity that has been disposed of or is classified as held for sale and that represents a separate major line of business or geographical area of operations, is part of a single coordinated plan to dispose of such a line of business or area of operations, or is a subsidiary acquired exclusively with a view to resale. The results of discontinued operations are presented separately in the statement of profit or loss.

2.15 Impairment of non-financial assets (excluding goodwill and indefinite life intangible assets)

The Group assesses assets or groups of assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If any such indication of impairment exists, the Group makes an estimate of the asset's recoverable amount. Individual assets are grouped for impairment assessment purposes at the lowest level Cash Generating Unit (CGU) at which there are identifiable cash flows that are largely independent of the cash flows of other groups of assets. An asset group's recoverable amount is the higher of its fair value less costs of disposal and its value in use. Where the carrying amount of an asset group exceeds its recoverable amount, the asset group is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators. The Group bases its impairment calculation on the most recent budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations are approved by management and generally covers a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year.

For assets or CGUs excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's or CGU's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset or CGU does not exceed either its recoverable amount, or the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset or CGU in prior years. Such a reversal is recognised in profit or loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase and is recognized through other comprehensive income.

Goodwill and Intangible assets with indefinite useful lives

Goodwill and intangible assets with indefinite useful lives are tested for impairment annually either individually or at the cash-generating unit (CGU) level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

Goodwill is allocated to the CGU for the purpose of impairment testing. The allocation is made to those CGUs or groups of CGUs that are expected to benefit from the business combination in which the goodwill arose. The units or groups of units are identified at the lowest level at which goodwill is monitored for internal management purposes, being the operating segments.

2.16 Employee Benefits

2.16.1 Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits, annual leave and accumulating sick leave that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the statement of financial position.

For the year ended 31 December 2023

2.16.2 Post-employment benefits

In accordance with the laws and practices of Nigeria, the Group participates in employee benefit plans offering retirement, death and disability, healthcare and special termination benefits. These plans provide benefits based on various factors such as length of service, salaries, and contributions made to the Closed Pension Administrator (NNPC Pensions Limited) responsible for the management of the funds on behalf of the employees.

These plans are both defined contribution plan (pensions) and defined benefit plans and are entirely or partially funded with investments made in various non-Group instruments.

Defined contributions: Pensions

The Group operates a defined contributory scheme with various Pension Fund Administrators. This is in compliance with the provision of the Pension Reform Act, 2014 whereby employer and employees contribute 10% and 8% respectively based on each of the employees' eligible allowances. Staff contributions to the scheme are funded through payroll deductions, while the Group's contribution is charged to the profit or loss. The Group has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

Defined benefit: Pension & Gratuity

The Group operates a defined benefit pension plan which requires contributions to be made to a separately administered fund (NNPC Pension Fund Limited). The benefit is funded by both the employer and the employees at 15% and 8% respectively. The cost of providing benefits under the defined benefit plan is determined for the plan using the projected unit credit method. Remeasurement gains and losses for the defined benefit plans are recognised in full in the period in which they occur in other comprehensive income. Such Remeasurement gains and losses are also immediately recognised in retained earnings and are not reclassified to profit or loss in subsequent periods.

The defined benefit asset or liability comprises the present value of the defined benefit obligation (using the discount rate based on market yields on Government bonds. The Group has adopted FGN Bonds since Nigeria does not have a deep market in Corporate bonds although State Bonds exist with (broadly) higher yields), less past service costs and less the fair value of plan assets out of which the obligations are to be settled. Plan assets are assets that are held by a long-term employee benefit fund. Plan assets are not available to the creditors of the Group, nor can they be paid directly to the Group. Fair value of the plan assets are based on market price information and in the case of quoted securities it is the published bid price. The value of any defined benefit asset recognised is restricted to the sum of any past service costs and the present value of any economic benefits available in the form of refunds from the plan or reductions in the future contributions to the plan.

Past service costs are recognised in profit or loss on the earlier of:

- The date of the plan amendment or curtailment; and
- The date that the Group recognises related restructuring costs.

Net interest is calculated by applying the discount rate to the net defined benefit obligation and the fair value of the plan assets.

The Group recognises the following changes in the net defined benefit obligation under employee benefit expenses in general and administrative expenses:

a. service costs comprises current service costs, past-service costs, gains and losses on curtailments and non-routine settlements

b. net interest cost

2.16.3 Other post-employment benefits

The net obligation for other retirement benefits, other than the pension plan, contractually defined, is the amount of future benefits that employees have earned for their services during the current and prior periods. These benefits include retirement medical plan benefits for eligible employees at retirement. The obligation is calculated using the projected unit credit method, and is discounted to reflect its present value and is reduced by the fair value of related assets, if any. The discount rate reflects the yield which, at the date of the financial statements, is referenced to market yields on high quality corporate bonds (except where there is no deep market in such bonds, in which case the discount rate should be based on market yields on government bonds) and having maturities similar to those of the obligations. Cost of past services and re-measurement gains or losses are recorded using the same methodology as used for the defined benefit plan.

2.16.4 Other long term employee benefits

The net obligation for other long term employment benefits, long service awards, is the present value of the amount of future benefits that employees have earned for their services during the current and prior periods at the end of the reporting period. The employee qualifies for the long service award after he/she might have spent 10 years of continuous service in the Group. The obligation is calculated using the projected unit credit method, and is discounted to reflect its present value and is reduced by the fair value of related assets, if any. The discount rate reflects the yield which, at the date of the financial statements, is referenced to market yields on high quality corporate bonds (except where there is no deep market in such bonds, in which case the discount rate should be based on market yields on government bonds) and having maturities similar to those of the obligations. Cost of past services, current services and remeasurement gains or losses are recognised immediately in the profit or loss.

For the year ended 31 December 2023

2.17 Provisions, Contingent Liabilities and Contingent Assets

Provisions

A provision is recognised when the Group has a present obligation (legal or constructive) as a result of a past event, for which it is probable that an outflow of resources will be required and when a reliable estimate can be made regarding the amount of the obligation. The amount of the liability corresponds to the best possible estimate.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as part of finance costs in profit or loss. Provisions are split between amounts expected to be settled within 12 months of the reporting period (current) and amounts expected to be settled later (non-current).

Contingent liabilities and asset

Contingent liabilities are possible obligations whose existence will only be confirmed by future events not wholly within the control of the Group, or present obligations where it is not probable that an outflow of resources will be required or the amount of the obligation cannot be measured with sufficient reliability. Contingent liabilities are not recognized in the financial statements but are disclosed unless the possibility of an outflow of economic resources is considered remote.

Where the Group expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to any provision is presented in profit or loss net of any reimbursement.

Asset retirement obligations (Decommissioning liability)

Decommissioning liability is recognised when the Group has a present legal or constructive obligation as a result of the past events, and it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. A corresponding amount equivalent to the provision is also recognised as part of the cost of the related oil and natural gas assets or property, plant and equipment as appropriate. When the liability is initially recognised, the present value of the estimated costs is capitalised by increasing the carrying amount of the related oil and natural gas assets to the extent that it was incurred by the development/construction of the field. Any decommissioning obligations that arise through the production of inventory are expensed when the inventory item is recognised in cost of goods sold. Changes in the estimated timing of decommissioning or changes in the estimated dismantlement, removal and restoration costs are dealt with prospectively by recording an adjustment to the provision, and a corresponding adjustment to the related oil and natural gas assets or property, plant and equipment.

Any reduction in the decommissioning liability and, therefore, any deduction from the asset to which it relates, may not exceed the carrying amount of that asset. If it does, any excess over the carrying value is taken immediately to profit or loss.

If the change in estimate results in an increase in the decommissioning liability and, therefore, an addition to the carrying value of the asset, the Group considers whether this is an indication of impairment of the asset as a whole, and if so, tests for impairment in accordance with IAS 36. If, for mature fields, the estimate for the revised value of oil and natural gas assets net of decommissioning provisions exceeds the recoverable value, that portion of the increase is charged directly to expense.

The amount recognised is the estimated cost of dismantlement, removal and restoration, discounted to its present value using a current pre-tax rate that reflects the risks specific to the liability.

Over time, the discounted liability is increased for the change in present value based on the discount rate that reflects current market assessments and the risks specific to the liability. The periodic unwinding of the discount is recognised in profit or loss as a finance cost.

Environmental expenditures and liabilities

Environmental expenditures that relate to current or future revenues are expensed or capitalised as appropriate. Expenditures that relate to an existing condition caused by past operations and do not contribute to current or future earnings are expensed. Liabilities for environmental costs are recognised when a clean-up is probable and the associated costs can be reliably estimated. Generally, the timing of recognition of these provisions coincides with the commitment to a formal plan of action or, if earlier, on divestment or on closure of inactive sites. The amount recognised is the best estimate of the expenditure required. If the time value of money is material, the amount recognised is the present value of the estimated future expenditure. Where the liability will not be settled for a number of years, the amount recognized is the present value of the estimated future expenditure. Subsequent adjustments to estimates, to the extent required, may be made as more refined information becomes available.

For the year ended 31 December 2023

Site restoration costs

The activities of the Group gives rise to dismantling, decommissioning and site restoration activities. Provision is made for the estimated cost of site restoration and capitalized in the relevant asset category unless it arises from the normal course of production activities in which case it is recognised in profit or loss.

Provisions are measured at the present value of management's best estimate of expenditure required to settle the present obligation at the balance sheet date. Subsequent to the initial measurement, the obligation is adjusted at the end of each year to reflect the passage of time and changes in the estimated future cash flows underlying the obligation.

The increase in provision due to passage of time is recognised as finance costs whereas increases/decreases due to changes in the estimated future cash flows are capitalized. Actual costs incurred upon settlement of the site restoration obligation are charged against the provision to the extent that the provision was established.

2.18 Financial instruments

Financial assets

a) Classification and measurement

Financial assets are classified, at initial recognition, as financial assets measured at amortised cost, Fair Value Through Profit or Loss (FVTPL) and Fair Value Through Other Comprehensive Income (FVOCI). The Group determines the classification of its financial assets at initial recognition.

The classification of debt financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them.

Subsequent measurement

Subsequent measurement: debt financial instruments

The subsequent measurement of financial assets depends on their classification. Financial assets are not reclassified after their initial recognition unless the Group changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

For purposes of subsequent measurement, financial assets are classified in three categories:

- Financial asset at amortised cost
- Financial asset at fair value through OCI.
- Financial assets at fair value through profit or loss.

Financial asset at amortised cost

The Group measures financial assets at amortised cost if the asset is held within a business model with the objective of collecting contractual cash flows, and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

Financial assets at amortised cost are subsequently measured using the effective interest rate (EIR) method and are subject to impairment. Gains and losses together with foreign exchange gains and losses are recognised in profit or loss when the asset is derecognised and impaired.

The Group's financial assets at amortised costs includes trade and other receivables, intergroup receivables, staff loans and Cash and short term deposits.

Financial assets at fair value through OCI

Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses, which are recognised in profit or loss.

When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income from these financial assets is included in finance income using the effective interest rate method. Foreign exchange gains and losses are presented in other gains/(losses), and impairment expenses are presented as separate line item in the statement of profit or loss.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include financial assets held for trading, financial assets designated upon initial recognition at fair value through profit or loss, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are required for the purpose of selling or repurchasing in the near team. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at fair value through profit or loss, irrespective of the business model. Notwithstanding the criteria for debt instruments to be classified at amortised cost or at fair value through OCI, as described above, debt instruments may be designated at fair value through profit or loss on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

For the year ended 31 December 2023

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in the statement of profit or loss.

As at the reporting date, the Group had no debt financial assets measured at fair value through profit or loss.

Subsequent measurement: equity instrument

The group subsequently measures all equity investments at fair value. Where the group's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income when the group's right to receive payments is established.

The Group elected to classify irrevocably its non-listed equity investments under this category.

Changes in the fair value of financial assets at FVPL are recognised in other gains/(losses) in the statement of profit or loss as applicable. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

b) Impairment of financial assets

The Group recognizes an allowance for Expected Credit Losses ('ECL') for all its debts financial assets not held at FVTPL. ECLs are based on the difference between the contractual cash flows due from the assets and all cash flows that the Group expects to receive, discounted at the effective interest rate.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and informed credit assessment and including forward-looking information.

The Group applies the simplified approach or the three-stage general approach to determine impairment of receivables depending on their respective nature. The simplified approach is applied for trade receivables while the general approach is applied to inter-Group receivables, other receivables and cash and bank balances.

The simplified approach requires expected lifetime losses to be recognised from initial recognition of the receivables. This involves determining the expected loss rates using a provision matrix that is based on the Group's historical default rates observed over the expected life of the receivable and adjusted forward-looking estimates. This is then applied to the gross carrying amount of the receivable to arrive at the loss allowance for the period.

The three-stage approach assesses impairment based on changes in credit risk since initial recognition using the past due criterion and other qualitative indicators such as increase in political concerns or other macroeconomic factors and the risk of legal action, sanction or other regulatory penalties that may impair future financial performance. Financial assets classified as stage 1 have their ECL measured as a proportion of their lifetime ECL that results from possible default events that can occur within one year, while assets in stage 2 or 3 have their ECL measured on a lifetime basis.

c) Derecognition

Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the group has transferred substantially all the risks and rewards of ownership.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified as financial liabilities at fair value through profit or loss; or as financial liabilities measured at amortised cost, as appropriate. The Group determines the classification of its financial liabilities at initial recognition. All financial liabilities are recognised initially at fair value.

Subsequent measurement

After initial recognition, financial liabilities are subsequently measured at either amortised cost or at fair value through profit or loss.

Financial liabilities at amortised cost

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the Effective Interest Rate (EIR) method. Gains and losses are recognised in profit or loss when the liabilities are derecognised. Amortised cost is calculated by considering any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation interest is included as finance costs in profit or loss.

For the year ended 31 December 2023

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for repurchasing in the near term. Gains or losses on liabilities held for trading are recognised in the statement of profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in IFRS 9 are satisfied. The Group has not designated any financial liabilities at fair value through profit or loss.

a) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in profit or loss.

b) Offsetting of financial assets and financial liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously. The offset is not contingent on a future event and must be exercisable by any of the counterparties, both in the normal course of business and in the event of default, insolvency or bankruptcy.

Write off policy

Financial assets are written off when there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include, amongst others, the failure of a debtor to engage in a repayment plan with the Group, and a failure to make contractual payments for a period of greater than 365 days past due. Impairment losses on trade receivables are presented as net impairment losses on the face of the income statement. Subsequent recoveries of amounts previously written off are credited against same line item.

Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, cash at bank, and other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

2.19 Interests in joint arrangements

A joint arrangement is an arrangement over which two or more parties have joint control. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities (being those that significantly affect the returns of the arrangement) require unanimous consent of the parties sharing control.

2.19.1 Interests in joint operations

A joint operation is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets and obligations for the liabilities, relating to the arrangement.

In relation to its interests in joint operations, the Group recognises its:

- · Assets, including its share of any assets held jointly
- · Liabilities, including its share of any liabilities incurred jointly
- Revenue from the sale of its share of the output arising from the joint operation
- Share of the revenue from the sale of the output by the joint operation
- · Expenses, including its share of any expenses incurred jointly

2.19.2 Investment in joint ventures

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement. The Group's investment in its joint venture is accounted for using the equity method. Under the equity method, the investment in the joint venture is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the joint venture since the acquisition date. Goodwill relating to the joint venture is included in the carrying amount of the investment and is not individually tested for impairment.

The statement of profit or loss reflects the Group's share of the results of operations of the joint venture. Unrealised gains and losses resulting from transactions between the Group and the joint venture are eliminated to the extent of the interest in the joint venture. The aggregate of the Group's share of profit or loss of the joint venture is shown on the face of the statement of profit or loss and other comprehensive income as part of operating profit and represents profit or loss after tax and NCI in the subsidiaries of joint venture.

The financial statements of the joint venture are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group. At each reporting date, the Group determines whether there is objective evidence that the investment in the joint venture is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the joint venture and its carrying value, and then recognises the loss as 'Share of profit of a joint venture' in the statement of profit or loss and other comprehensive income.

On loss of joint control over the joint venture, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the joint venture upon loss of joint control and the fair value of the retained investment and proceeds from disposal is recognised in the statement of profit or loss and other comprehensive income.

For the year ended 31 December 2023

In the separate financial statements of the Company, investments in joint ventures are treated the same as the Group as disclosed above.

2.20 Insurance contracts- classification

Wheel Insurance (a subsidiary of NNPC Limited) issues contracts of (re)insurance under which one party (the (re)insurer) accepts significant (re)insurance risk from another party (the policyholder) by agreeing to compensate the policyholder if a specified uncertain future event (the (re)insured event) adversely affects the policyholder. As a general guideline, the Group defines significant (re)insurance risk as the possibility of having to pay claims to the policyholder in excess of the premiums received for assuming this risk if the (re)insured event occurs.

2.21 Investment in associates

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

The Group's investments in its associate is accounted for using the equity method.

Under the equity method, the investment in an associate is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate since the acquisition date. Goodwill relating to the associate is included in the carrying amount of the investment and is neither amortised nor individually tested for impairment.

The statement of profit or loss reflects the Group's share of the results of operations of the associate. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognised directly in the equity of the associate, the Group recognises its share of any changes, when applicable, in the statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the interest in the associate.

The aggregate of the Group's share of profit or loss of an associate is shown on the face of the statement of profit or loss outside operating profit. The financial statements of the associate are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in its associate. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value, then recognises the loss/profit as 'Share of profit/loss of an associate' in the statement of profit or loss.

Upon loss of significant influence over the associate, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

In the separate financial statements of the Company, investments in associates are treated the same as the Group as disclosed above.

2.22 Royalty

Royalties payable are calculated as a percentage of the value of the Company's share of crude oil produced or won at realisable price for each year. Royalties are classified as statutory payments to the Federal Government.

2.23 Comparatives

Except when a standard or an interpretation permits or requires otherwise, all amounts are reported or disclosed with comparative information. Where necessary, comparative figures have been adjusted to conform with changes in presentation in the current year.

2.24 Commercial arrangements

The Group is in the business of prospecting, exploration and production of crude oil and gas through various wholly owned assets, joint venture arrangements and production sharing contracts with other companies in the industry. All the concessions are within Nigeria. In the Production Sharing Contracts (PSC) and Joint Venture arrangements (JV), the parties fund the exploration, development and production costs. In the PSC arrangement, the contactors are reimbursed in the event of successful exploration by the allocation of crude oil and gas produced from the fields under certain terms and the Group is entitled to 30% Management fee of the profits accruing from the operations. The Group realises its revenue from the sale of the crude oil and gas from wholly owned assets and equity share from JVs operations.

The Group has the following commercial arrangements as of 31 December 2023.

Joint Operations

The Nigerian National Petroleum Company Limited has participating interests in certain Oil Prospecting Licenses (OPLs) and Oil Mining Licenses (OMLs) covered under the various Joint Operating Agreements (JOAs) as detailed below:

Operator	Company's interest December 2023
	%
The Shell Petroleum Development Company of Nigeria Limited	55
Chevron Nigeria Limited	60
Total E&P Nigeria Limited	60
Mobil Producing Nigeria Unlimited	60
Aiteo Exploration and Production Limited	55
NNPC Eighteen Operating Limited	55
First E & P Development Company Limited	60
Seplat Petroleum Development Company	60
West African Exploration and Production Company Limited	55
	December 2023
	%
Amni International Petroleum Development Company	60
Belema oil Producing Limited	60
Heirs Holdings Oil and Gas Limited	55
NNPC E & P Limited (NEPL)	100

The NNPC Ltd also has participating interest in the Escravos gas to liquids project (the "EGTL Project"). The participating interest is below:

Chevron Nigeria Limited (CNL or "Operator")

60

In a joint operating arrangement, the parties exercise joint control of the arrangement and contribute resources (cash calls and other assets) and have rights to the assets and obligations for the liabilities relating to the arrangement to the extent of their respective equity interests.

Other Commercial Arrangements

Carry Agreement (Alternative Funding Agreements)

The Federal Government of Nigeria introduced the carry funding agreements since 2008 whereby the Operators finance NNPCL participating interest shares of agreed development costs of certain projects under certain terms and conditions. The carried party reimburses with oil.

Carry agreements between NNPCL and some of its partners in the JOAs are as follows:

Carry Party	NNPCL	Projects
	Interest	
Total E&P Nigeria Limited (TEPNG)	60%	Development of Amenam/Kpono field
Chevron Nigeria Limited	60%	Meji Redevelopment Project
Chevron Nigeria Limited	60%	North Swamp
Chevron Nigeria Limited	60%	South Offshore Water Injection Project (SOWIP)
Chevron Nigeria Limited	60%	Escravos Gas Project phase 3

Carry agreements (Modified carry agreements)

Under the agreements, the carried party is NNPCL, its share of project development expenditures based on its participating interest are reimbursed to the carrying parties by means of Carry Tax Relief (CTR) and Carry oil, amongst other terms.

The existing MCAs are as follows:

Notes to the Consolidated and Separate Financial Statements

For the year ended 31 December 2023

3 Significant accounting judgement, estimates and assumptions

The preparation of the Group's consolidated financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenue, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require material adjustments to the carrying amount of assets or liabilities affected in future periods prior to full liquidation.

In particular, the Group has identified the following areas where significant judgements, estimates and assumptions are required, and where if actual results were to differ, may materially affect the financial position or financial results reported in future periods. Further information on each of these and how they impact the various accounting policies are described.

3.1 Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognized in the consolidated financial statements:

a) Joint arrangements

Judgement is required to determine when the Group has joint control over an arrangement, which requires an assessment of the relevant activities and when the decisions in relation to those activities require unanimous consent. The Group has determined that the relevant activities for its joint arrangements are those relating to the operating and capital decisions of the arrangement, including the approval of the annual capital and operating expenditure work program and budget for the joint arrangement, and the approval of chosen service providers for any major capital expenditure as required by the joint operating agreements applicable to the entity's joint arrangements. The considerations made in determining joint control are similar to those necessary to determine control over subsidiaries.

Judgement is also required to classify a joint arrangement. Classifying the arrangement requires the Group to assess their rights and obligations arising from the arrangement. Specifically, the Group considers:

- The structure of the joint arrangement whether it is structured through a separate vehicle
- When the arrangement is structured through a separate vehicle, the Group also considers the rights and obligations arising from:
- The legal form of the separate vehicle
- The terms of the contractual arrangement
- Other facts and circumstances, considered on a case by case basis

The Joint arrangement in relation to WAGL Energy Limited, Hyson, Carlson, Anoh Gas, Nikorma requires unanimous consent for all parties for all relevant activities. The Company has direct right to the net assets of the partnership. These entities are therefore classified as joint ventures and have been accounted for using the equity method of accounting.

Determination of joint venture- Hyson Nigeria Limited

Management have determined that they do not control Hyson Nigeria Limited even though the Company owns 60% of the issued capital of this entity. Hyson Nigeria Limited is a joint venture company between NNPCL and VITOL. None of the parties to this joint venture company has a unilateral control of the entity. Decisions about relevant activities require the unanimous approval of the two parties.

b) Determining the lease term

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

The following factors are normally the most relevant:

- If there are significant penalties to terminate (or not extend), the Group is typically reasonably certain to extend (or not terminate).
- If any leasehold improvements are expected to have a significant remaining value, the Group is typically reasonably certain to extend (or not terminate).
- Otherwise, the Group considers other factors, including historical lease durations and the costs and business disruption required to replace the leased asset.

The lease term is reassessed if an option is actually exercised (or not exercised) or the Group becomes obliged to exercise (or not exercise) it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstances occurs, which affects this assessment, and is within the control of the lessee. During the financial year, there were no revised lease terms.

Notes to the Consolidated and Separate Financial Statements

For the year ended 31 December 2023

3.2 Estimates

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Group based its assumptions and estimates on parameters available when the consolidated and separate financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

a) Review of useful life and residual value of property, plant and equipment

The Group carries its property, plant and equipment at cost less accumulated depreciation/ impairment in the Statement of financial position. Estimates and assumptions made to determine their carrying value and related depreciation are critical to the Group's financial position and performance. The charge in respect of periodic depreciation is derived after determining an estimate of an asset's expected useful life and the expected residual value at the end of its life. The economic life of an asset is determined based on existing wear and tear, economic and technical aging, legal or other limits on the use of the asset, and obsolescence. If some of these factors were to deteriorate materially, impairing the ability of the asset to generate future cash flow, the Group may accelerate depreciation charges to reflect the remaining useful life of the asset or record an impairment loss. The carrying values of this amount is included in Note 19.

b) Impairment of non-current assets

Impairment exists when the carrying value of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its fair value less costs to sell and its value in use. The fair value less costs to sell calculation is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. The value in use calculation is based on a discounted cash flow model. The cash flows are derived from the budget for the next five years and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset's performance of the cash generating unit being tested. The recoverable amount is most sensitive to the discount rate used for the discounted cash flow model as well as the expected future cash-inflows and the growth rate used for extrapolation purposes. Examples of non-current asset tested for impairment includes oil and gas properties.

The Group assesses each asset or cash generating unit (CGU) (excluding goodwill, which is assessed annually regardless of indicators) each reporting period to determine whether any indication of impairment exists, Where an indicator of impairment exists a formal estimate of the recoverable amount is made, which is considered to be the higher of the fair value less costs to sell and value in use. The assessments require the use of estimates and assumptions such as long-term oil prices (considering current and historical prices, price trends and related factors), discount rates, operating costs, future capital requirements, decommissioning costs, exploration potential, reserves and operating performance (which includes production and sales volumes). These estimates and assumptions are subject to risk and uncertainty, therefore, there is a possibility that changes in circumstances will impact these projections, which may impact the recoverable amount of assets and/or CGUs. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. Fair value for oil and gas assets is generally determined as the present value of estimated future cash flows arising from the continued use of the assets, which includes estimates such as the cost of future expansion plans and eventual disposal. Using assumptions that an independent market participant may take into account, cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset/CGU. Management has assessed its CGUs as being an individual field, which is the lowest level for which cash inflows are largely independent of those of other assets.

c) Estimation of oil and gas reserves

Oil and gas reserves are key elements in testing for impairment and computation of depreciation, depletion and amortisation. Changes in proved oil and gas reserves will affect the standardized measure of discounted cash flows for value in use computation and changes in proved oil and gas reserves, particularly proved developed reserves, will affect unit-of-production depletion charges to income.

Proved oil and gas reserves are the estimated quantities of crude oil that geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions, i.e., prices and costs as of the date the estimate is made. Proved developed reserves are reserves that can be expected to be recovered through existing wells with existing equipment and operating methods.

Notes to the Consolidated and Separate Financial Statements

For the year ended 31 December 2023

Estimates of oil and gas reserves are inherently imprecise, require the application of judgment and are subject to future revision. Accordingly, financial and accounting measures (such as the standardised measure of discounted cash flows, depreciation, depletion and amortisation charges, and decommissioning and restoration provisions) that are based on proved reserves are also subject to change. Proved reserves are estimated by reference to available reservoir and well information, including production and pressure trends for producing reservoirs and, in some cases, subject to definitional limits, to similar data from other producing reservoirs. Proved reserves estimates are attributed to future development projects only where there is a significant commitment to project funding and execution and for which applicable governmental and regulatory approvals have been secured or are reasonably certain to be secured.

Furthermore, estimates of proved reserves only include volumes for which access to market is assured with reasonable certainty. All proved reserves estimates are subject to revision, either upward or downward, based on new information, such as from development drilling and production activities or from changes in economic factors, including product prices, contract terms or development plans. Changes in the technical maturity of hydrocarbon reserves resulting from new information becoming available from development and production activities have tended to be the most significant cause of annual revisions.

d) Units of production depreciation of Oil and gas assets

Oil and gas properties are depreciated using the units of production (UOP) method over total proved developed and undeveloped hydrocarbon reserves. This results in a depreciation/depletion/amortization charge proportional to the anticipated remaining production from the field. Each items' life, which is assessed annually, has regard to both its physical life limitations and to present assessments of economically recoverable reserves of the field at which the asset is located. These calculations require the use of estimates and assumptions, including the amount of recoverable reserves and estimates of future capital expenditure, The calculation of the UOP rate of depreciation could be impacted to the extent that actual production in the future is different from current forecast production based on total proved reserves, or future capital expenditure estimates changes. Changes to proved reserves may arise due to changes in the factors or assumptions used in estimating reserves. The carrying values of these assets are included in Note 19.1.

e) Decommissioning costs

Decommissioning costs will be incurred by the Group at the end of the operating life of some of the Group's facilities and properties. The Group assesses its decommissioning provision at each reporting date. The ultimate decommissioning costs are uncertain and cost estimates can vary in response to many factors, including changes to relevant legal requirements the emergence of new restoration techniques or experience at other production sites. The expected timing, extent and amount of expenditure can also change, for example in response to changes in reserves or changes in laws and regulations or their interpretation. Therefore, significant estimates and assumptions are made determining the provision for decommissioning. As a result, there could be significant adjustments to the provisions established which would affect future financial results. The provision at reporting date represents management's best estimate of the present value of the future decommissioning costs required. The carrying values of these obligations are included in Note 35.

f) Retirement benefit obligation

The cost of defined benefit plans (pension, gratuity, medical and long service award) and the present value of the obligation are required to be determined annually using actuarial valuations. An actuarial valuation involves making various estimates and assumptions. These include the determination of the future returns on each different type of scheme asset, discount rate, future salary increases, employee attraction rates, mortality rates, expected remaining periods of service of employees and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date. In determining the appropriate discount rate, management considers the government rate on bonds with similar maturities corresponding to the expected duration of the defined benefit obligation for use. The mortality rate is based on publicly available mortality tables in the country and future salary increases and pension increases are based on expected future inflation rates obtainable in the country. The carrying values of this obligation is included in Note 36.

g) Impairment of financial assets

The loss allowances for financial assets are based on assumptions about risk of default, expected loss rates and maximum contractual period. The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Group's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. See Note 48.2 for more details.

4 Information about subsidiaries

4.1 The summarized balance held as investments in subsidiaries in the Company's book is presented as follows:

6 Interest in joint operations, associates and joint ventures

6.1 Interest in joint operations - Group

6.1.1 Production- sharing contract (PSC)

A subsidiary of the Group, NNPC E&P Limited entered into various production sharing contracts (PSCs) with other companies in the industry for the exploration and drilling of some oil blocks under the terms of the various agreements. NNPC E&P Limited's portion of the capital costs incurred for the purpose of petroleum operations is being funded by the operator (carrying party). The operator will recover NNPC E&P's share of cost through the proceeds of NNPC E&P's share of crude production entitlements. Production sharing contracts (PSCs) include the Joint Operating agreements and service contracts.

The contract entered into includes an agreement with AGIP on OPL 244 and Devon Energy on OPL 256 whereby its share of the cost of exploration and drilling are funded by the operators of the blocks. On commencement of commercial production on these blocks, the operators will recover their funding of the company's share of cost through the proceeds of the company's share of crude production entitlements.

6.2 Interest in joint operations - Company

6.2.1 Upstream petroleum operations/participations

The Nigerian National Petroleum Company Limited has participating interests in certain Oil Prospecting Licenses (OPLs) and Oil Mining Licenses (OMLs) covered under the various Joint Operating Agreements (JOAs) as detailed below:

Operator	NNPCL Interest	NNPCL Interest
	2023	2022
	%	%
The Shell Petroleum Development Company of Nigeria Limited	55	55
Chevron Nigeria Limited	60	60
Total E&P Nigeria Limited	60	60
Mobil Producing Nigeria Unlimited	60	60
Aiteo Exploration and Production Limited	55	55
First E & P Development Company Limited	60	60
Seplat Energy	60	60
West African Exploration and Production Company Limited	55	55
Amni International Petroleum Development Company	60	60
Belema Oil Producing Limited	60	60
Heirs Holdings Oil and Gas Limited	55	55
NNPC E&P Limited (OML 86/88)	100	60
NNPC Eighteen Operating Limited	55	

The Nigerian National Petroleum Company Limited also has participating interests in the Escravos gas to liquids project (the "EGTL Project"). The participating interest is below:

	NNPCL Interest	NNPCL Interest
	2023 (%)	2022 (%)
Chevron Nigeria Limited (CNL or "Operator")	60	60

6.2.2 Other Commercial Arrangements

i Carry Agreements (Alternative Funding Agreements)

Carry agreements between NNPCL and some of its partners in the JOAs are as follows:

Carry Party	NNPCL Interest	Carry Party
Total E&P Nigeria Limited	60%	Development of Amenam/Kpono field
Chevron Nigeria Limited	60%	Meji Redevelopment Project
Chevron Nigeria Limited	60%	North Swamp
Chevron Nigeria Limited	60%	South Offshore Water Injection Project (SOWIP)
Chevron Nigeria Limited	60%	EGP3

ii Carry Agreements (Modified Carry Agreements)

Under the agreements, the carried party is NNPCL, its share of project development expenditures based on its participating interest are reimbursed to the carrying parties by means of Carry Tax Relief (CTR) and Carry oil, amongst other terms.

Notes to the Consolidated and Separate Financial Statements

For the year ended 31 December 2023

The existing MCAs are as follows:

Project

• Gbaran- Ubie Phase 2A

• Ofon 2

• OML 58

• Oso Condensate

• Gbaran-Ubie Phase 1

• 2007-2009 Drilling Bundle

• 2010 Drilling Bundle

Carry Party

Shell Petroleum Development Company of Nigeria Limited

Total E&P Nigeria Limited (TEPNG) Total E&P Nigeria Limited (TEPNG)

Mobil Producing Nigeria Unlimited

Shell Petroleum Development Company of Nigeria Limited

Mobil Producing Nigeria Unlimited Mobil Producing Nigeria Unlimited

Unitisation Agreement-Ekanga Zaffiro field

NNPC Limited and Elf Petroleum Nigeria Limited, together called Block 102 participants entered into a unitisation and unit operating agreement with The Federal Republic of Equatorial Guinea (represented by its Ministry of Mines and Hydrocarbons), Mobil Equatorial Guinea Incorporated and Ocean Equatorial Guinea Company (together called Block B participants).

The Block 102 participants are holders of OML (Oil Mining Lease) 102 and the agreement is for the purpose of enabling the unit area to be developed as a unitised field by utilising Block B facilities and infrastructure. The Block 102 participating interest is divided between Nigerian National Petroleum Corporation and Total E&P Nigeria Limited in the ratio 60:40 and they are remunerated by way of rental entitlements related to production from the field. The production profile for the Block 102 is approximately 11.5 years. The rental entitlements are settled via cash payments from proceeds of sale of crude or direct lifting of crude oil from the field by the Block 102 participants.

6.3 Interest in associates and joint ventures

Set out below are the associates and joint ventures of the Group as at 31 December 2023 which, in the opinion of the directors, are material to the group. The entities listed below have share capital consisting solely of ordinary shares, which are held directly by the Group. The country of incorporation or registration is also their principal place of business, and the proportion of ownership interest is the same as the proportion of voting rights held.

The Group has joint ventures with the following equity interests:

Proportion of equity interest held in Joint ventures

Name		incorporation	31 December 2023 % of ownership interest	Ownership within the Group
WAGL Energy	Offtake, marketing and trading of NLNG NGLs under the equity lifting scheme	Nigeria	60%	NNPCL
Hyson (Nigeria) Limited*	Provision of logistic and operational services, marketing of excess crude oil	Nigeria	60%	NNPCL
Calson Bermuda Limited	Marketing of crude oil and petroleum products	Bermuda	51%	NNPCL
Anoh Gas Processing Company Limited	Gas processing	Nigeria	50%	NGIC
Nikorma Transport Limited	Shipping and marine transportation.	Nigeria	51%	NNPCL

^{*}Decisions relating to control of all the entities above require agreement of both parties hence, this has been treated as a joint venture in accordance with the joint venture agreement between the two parties.

None of the entities stated above are listed.

Calson obtained a waiver during the year to not prepare financial statements for the period ended 31 December 2023.

As at December 2023, Gwagwalada power had not started operations, and Hyson is undergoing liquidiation. These entities have no financial statements.

The figures reported in the profit or loss and other comprehensive income for the period represents 100% of the amount reported in the individual joint venture financial statements.

*The share of profit of NNPCL in Nikorma Transport was not recognised since the accumulated share of loss is higher than the initial investments made by NNPC (Corporation) and transferred to NNPC Limited.

Notes to the Consolidated and Separate Financial Statements

For the year ended 31 December 2023

6.3.4 Summarised statement of profit or loss of the joint ventures are as follows

For the year ended 31 December 2023

NNPCL has 30% interest in Azikel Petroleum, and 49% interest in N21 Technology. Azikel Petroleum is not yet operational whilst N21 Technology has been dissolved as at 31 December 2023. NLNG, OKLNG and WAGPC are not included as part of the Group's investment in associates because the investment is held in trust by NNPC.

NNPC's investment in Gas aggregate company of Nigeria Limited (GACNL) was derecognised due to the change in the membership status of the company from limited by shares to limited by Guarantee.

As at December 2023, Brass Terminal and Brass Fertilizer had not started operations.

6.4.3 Summarised statement of comprehensive income of the Group and Company's associates for the periods ended 31 December 2023 and 31 December 2022 are as follows:

	Netcodietsmann

7 Business Combination

7.1 Summary of acquisition

On 1 October 2022, Nigerian National Petroleum Company Limited ("NNPCL") acquired 100% of the voting shares of Nueoil Energy Limited ("Nueoil") —a non-listed company based in Lagos, Nigeria whose principal activities are to carry on all or any of the business of oil, gas and energy—from Riverbrand Energy Limited. NNPCL acquired Nueoil Energy Limited because it presents an opportunity for NNPCL to capture a third of the retail market share and also presents the opportunity for NNPCL to acquire two blending plants which would enable the Company to participate in the lubricant market on a higher scale.

Details of the purchase consideration, the net assets acquired and goodwill are as follows:

7.1.1 Goodwill computation

	US\$'000	N'M
Cash paid	325,090	135,049
Purchase consideration	325,090	135,049
Less: Nueoil's fair value of identifiable net assets as at acquisition date	292,301	126,382
Goodwill as at acquisition date	32,789	8,667
Goodwill impairment		_
Goodwill as at reporting date	32,789	8,667

The goodwill is attributable to the workforce acquired, market share, customer relationships and location of the acquired business. It will not be deductible for tax purposes.

Acquisition-related cost of US\$1,500,000 being issuance fees for the Letter of Credit facility provided by Africa Finance Corporation (AFC) are not directly attributable to the cost of investment. This cost has been included in administrative expenses in the statement of profit or loss and in operating cash flows in the statement of cash flows.

For the year ended 31 December 2023

7.1.2 Net identifiable assets acquired

The assets and liabilities recognised as a result of the acquisition are as follows:

	1 October	1 October
	2022	2022
	\$'000	N'M
Property, plant and equipment	206,019	89,076
Intangible assets	21	9
Right-of-use assets	8,815	3,811
Prepayment and other assets	29,749	12,862
Inventories	83,745	36,209
Trade and other receivables	51,825	22,408
Cash and short-term deposits	16,709	7,225
Deferred tax liabilities	(11,932)	(5,159)
Employee benefits liability	(129)	(56)
Decommissioning liability	(5,312)	(2,297)
Trade and other payables	(74,140)	(32,056)
Customers and security deposits	(9,770)	(4,224)
Current tax liabilities	(3,116)	(1,347)
Lease liabilities	(183)	(79)
Net identifiable assets acquired*	292,301	126,382
Add: Goodwill (Note 7.1.1)	32,789	8,667
Net assets acquired	325,090	135,049

^{*} The net assets recognised in the 31 December 2022 financial statements were based on their provisional fair values while the Group sought an independent valuation of their fair values. As at 31 December 2023, the valuation has been completed and all resulting changes in fair value have been adjusted against goodwill.

7.1.3 Post-acquisition profit/(loss) from Nueoil

Post-acquisition profit/(loss) from Nueoil Limited is computed as follows:

	1 October	31 December	Post-acquisition
	2022	2022	reserve
	N'M	N'M	N'M
Share capital	1	1	-
Share Premium	22,066	22,066	-
Other reserves	81,732	80,564	(1,168)
Retained (loss)/earnings	(28,262)	(26,933)	1,329
Non controlling interest	(309)	(114)	195
Goodwill*	(38,481)	(38,481)	-
Post-acquisition profit/(loss)		<u> </u>	356

^{*} The existing goodwill in Nueoil's financial statements have not been considered as part of the identifiable net assets of Nueoil for the purpose of the Group's goodwill computation on the acquisition of Nueoil.

7.1.4 Impact on NNPCL's retained earnings

7.1.4 Impact on 1441 of 5 returned currings	31 December
	2022
	N'M
NNPCL's retained earnings balance	1,343,820
Post-acquisition profit from Nueoil (Note 7.1.3)	356
Goodwill impairment	
Adjusted retained earnings	1,344,176
7.1.5 Purchase consideration - cash outflow	
	1 October
	2022
	N'M
Purchase consideration (Note 7.1.1)	135,049
Less: Balances acquired	
Cash	7,225
Bank overdraft	-
Net outflow of cash - investing activities	142,274

7.1.6 Revenue and profit contribution

The acquired business contributed revenues of \$202.65 million and net profit of \$1.25 million to the Group for the period from 1 October to 31 December 2022. If the acquisition had occurred on 09 March 2022 when Nueoil was incorporated, Nueoil's revenue and net loss contribution to the Group for the period ended 31 December 2022 would have been \$521.68 million and (\$4.24 million) respectively.

NOTES TO THE Consolidated and Separate Financial Statements

For the year ended 31 December 2023

8 Revenue from contracts with customers

	Group		Company	
	31 December 31 December		31 December 31 December 31 December 3	
	2023 N'M	2022 N'M	2023 N'M	2022 N'M
Revenue from crude oil sales	14,072,559	3,529,495	7,028,092	2,422,169
Revenue from petroleum product sales	7,148,620	4,503,351	151,790	186,958
Revenue from sales of natural gas	2,303,835	683,010	951,605	281,207
Revenue from sale of power	94	-	-	-
Revenue from services	464,940	100,528	-	-
	23,990,048	8,816,384	8,131,487	2,890,334

Revenue from crude oil sales is from sales of utilized crude during the year and liftings of equity interest in various oil assets. Petroleum products sales include the sale of Premium Motor Spirit (PMS), Dual Purpose Kerosene (DPK), Automotive Gasoline Oil (AGO), Naphtha, lubricants and other related products.

Sale of natural gas represents the invoice value (transaction price) of natural gas sold to third parties.

Revenue from services consist of revenue from seismic contracts, time based contracts, gas transmission tariffs, shipping, marine and engineering.

8.1 Disaggregation of revenue from contracts with customers

The Group and Company derives revenue from the transfer of commodities and provision of services at a point in time or over time in the following geographical regions.

Notes to the Consolidated and Separate Financial Statements

For the year ended 31 December 2023

Deferred Tax

Deferred income tax assets are recognised for tax losses carried forward to the extent that the realisation of the related tax benefit through future taxable profits is probable.

The Group offsets tax assets and liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority.

The joint venture and associate of the Group cannot distribute its profits until it obtains the consent from all venture partners and the equity owners respectively. The Company does not foresee giving such a consent at the reporting date.

Comparative information

Deferred tax

NNPCL previously offset deferred tax assets and deferred tax liabilities in the statement of financial position. However, deferred tax assets have arisen from gas activities taxed at the CIT rate of 30% and deferred tax liabilities have arisen from crude oil activities taxed at the PPT rate of 85%. As these are two tax regimes, these balances cannot be offset for settlement.

Prior year comparatives as at 31 December 2022 have been reclassified to present these balances on a gross basis with deferred tax assets of N593.2 billion being reclassified from deferred tax liabilities to deferred tax assets.

Notes to the Consolidated and Separate Financial Statements

For the year ended 31 December 2023

Oil and Gas properties - Continued

19.3 Production Sharing Contracts

Non Carried interest

A subsidiary of the Group, NNPC E&P Limited entered into various production sharing contracts (PSCs) with other companies in the industry for the exploration and drilling of some oil blocks under the terms of the various agreements. The subsidiary's portions of the capital costs of all equipment and land acquired for the purpose of petroleum operations are being funded by it through cash calls. In line with the accounting requirements for joint operations, NNPC E&P Limited's shares of the income, expenses, assets and liabilities of these operations have been included in the relevant account lines in NNPC E&P Limited's financial statements.

Carried Interests

NNPC E&P Limited entered into some Production Sharing Contracts (PSC) under carried interest arrangements. NNPC E&P Limited's share of the cost of exploration and drilling of these contracts are funded by the operators of the blocks listed below. On commencement of commercial production on the blocks, the carrying party will recover the cost of its funding from the proceeds of crude oil entitlements.

31 December 31 December

These have been not recognised in these financial statements in compliance with the requirements of the accounting standards.

NNPC E&P Limited's share of the cost incurred by the operators as per their performance report as at 31 December 2023 is as follows:

Internally generated intangible assets

Software

Software consists of capitalised development costs being an internally generated intangible asset. Software is measured on initial recognition at cost. Subsequently, software is carried at cost less accumulated amortisation and impairment losses due to changes in technology.

Other intangible assets

Goodwill

*Goodwill resulted from the acquisition of Neuoil during the 2022 year end. A provisional goodwill of N80.45 billion was reported in 2022 as the acquisition accounting had not been finalised. As at 31 December 2023, the acquisition accounting has been finalised and the resulting goodwill amounts to N8.67 billion. Please see note 7.1.1.

Goodwill is measured as described in note 1.4(ii). Goodwill is not amortised but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired, and is carried at cost less accumulated impairment losses. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Mineral rights license

Mineral rights are measured on initial recognition at cost. Following initial recognition, the mineral rights are carried at cost less accumulated amortisation and impairment losses. Mineral right license have been granted for a period of 10- 60 years by the relevant government agency and it is amortised over the period. The average remaining amortisation period for the mineral rights is between 1 year - 19 years.

The Group's quoted equity shares are the ordinary shares of First Bank Nigeria Limited and Nestle Plc, Cadbury Plc, Unilever Plc, Nigerian-German Chemical Plc and Schlumbeger . The fair value of the quoted shares are based on price quotation in an active market at the reporting date.

The Group's unquoted equity shares are its interests in Afreximbank and Dangote Refinery. The fair value of the unquoted shares are based on reporting date present value of expected future cash dividends.

Other financial assets at amortised cost are held to collect principal and interest and generate fixed interest income for the Group.

The staff loans are measured at amortised cost at the effective interest rate of 17%.

At 31 December		6,250,511	2,056,151	6,250,511	2,056,151

24.2.3 The total undefrayed cost is made up of January - May under-recovery of №3.3 trillion and August - December energy security expense of №1.8trillion.

Under recovery arises when landing cost of Premium Motor Spirit (PMS) is higher than the local regulated market price. These amounts are receivable to the Group as they are defrayed and charged against amounts due to Federation on a monthly basis. Energy security expenses are expenses incurred by the group in fulfilling it's obligations as the supplier of last resort for energy security purposes on the account of the federation inline with the provisions of Section 64(m) of the Petroleum Industry Act, 2021.

24.2.4 As at year end 31 December 2022, the amount to be remitted based on crude oil purchased is due 90 days after the period of lifting. During the period, the Company made a total cash payment of nil (2022: N58.8 billion) to the Federation leaving an outstanding payable of N6.25 trillion (2022: N2.06 trillion).

Nature and purpose of reserves 29 Financial assets at FVOCI reserves

The fair value reserve comprises the net cumulative change in the fair value of equity investments measured at fair value through other comprehensive income until the investment is derecognised.

30 Retained earnings/(accumulated loss)

Retained earnings/(accumulated loss) are the carried-forward recognised income/(loss) net of expenses plus current period profit/(loss) attributable to Shareholders.

Notes to the Consolidated and Separate Financial Statements

For the year ended 31 December 2023

31 Foreign currency translation reserve

Cumulative exchange differences arising from translating the financial statements of foreign subsidiaries from its functional currency to the Group's presentation currency (USD) are taken to foreign currency translation reserve.

32 Actuarial reserve

Gains and losses arising from the actuarial valuation are taken to the actuarial reserve (see note 17).

33 Capital contribution

Capital contribution relates to the net assets transferred from NNPC (Corporation) to NNPC Limited as well as additional contributions from Shareholders for the purpose of turnaround maintenance, security operations and for maintenance of refineries, petrochemicals and other plants.

other plants.

Alternative funding arrangements represents revenue from various carry arrangements with some of the Joint Operating partners.

34.1 Carry arrangements

NNPCL executed some alternative funding agreements with some of its Joint Operating partners (refer to Note 6.2.2). Under the agreements, the carrying parties fund NNPCL's participating interest share of the capital expenditure of the projects and are reimbursed by means of crude oil.

Decommissioning provision

The Group

*During the year, new wells were added to OML 34, 42, 13, 26, 60-63, 4, 38 & 41 assets increasing number of existing wells to 2,003. An estimated N466.7 billion (2022: N476.5 billion) was recognised as decommissioning liability for the new wells.

Disposal relates to the decommissioning liability for OML 86/88 wells which were disposed in the year under review.

The Group and Company makes full provision for the future cost of decommissioning of oil production facilities and pipelines on a discounted basis on the installation of those facilities.

The decommissioning provisions represents the present value of decommissioning costs relating to oil and gas properties, which are expected to be incurred from an estimated period ranging between 6 to 40 years which is when the producing oil and gas properties are expected to cease operations. These provisions have been created based on the Group's internal estimates.

Assumptions based on the current economic environment have been made, which management believes are a reasonable basis upon which to estimate the future liability. These estimates are reviewed regularly to take into account any material changes to assumptions. However, actual decommissioning costs will ultimately depend upon future market prices for the necessary decommissioning works required that will reflect market condition at the relevant time. Furthermore, the timing of decommissioning is likely to depend on when the fields cease to produce at economically viable rates. This, in turn, will depend upon future oil and gas process which are inherently uncertain.

The discount rates used in the calculation of the provision as at 31 December 2023 were based on various finance options for respective fields.

The Company

The Company makes full provision for the future cost of decommissioning oil production facilities and pipelines on a discounted basis on the installation of those facilities.

The decommissioning provisions represents the present value of decommissioning costs relating to oil and gas properties, which are expected to be incurred from an estimated period ranging between 6 to 40 periods which is when the producing oil and gas properties are expected to cease operations.

Assumptions based on the current economic environment have been made, which management believes are a reasonable basis upon which to estimate the future liability. These estimates are reviewed regularly to take into account any material changes to the assumptions. However, actual decommissioning costs will ultimately depend upon future market prices for the necessary decommissioning works required that will reflect market conditions at the relevant time.

Furthermore, the timing of decommissioning is likely to depend on when the fields cease to produce at economically viable rates. This, in turn, will depend upon future oil and gas prices, which are inherently uncertain.

Comparative information

Employee benefits

NNPCL previously presented defined benefit pension plan assets and defined benefit pension plan liabilities on a gross basis. However, these assets and obligations relate to one plan and should, therefore, be offset.

Prior year comparatives as at 31 December 2022 have been reclassified to present these balances on a net basis with a resulting net defined benefit pension plan asset of N253.9 billion.

iii. Risk exposures

The two key risk elements of pension financing are the longevity and the level of interest rates as described below;

Longevity risk:

The accrued liability is calculated based on the best estimate of expected mortality experience by the Fund members, the mortality assumption should be on a best estimate basis with appropriate adjustments to the standard mortality table to incorporate future mortality improvements. An increase in the members' life expectancy will increase the liability and vice versa.

Interest rate risk:

This is the valuation interest rate (Discount rate) used in determining the present value of the Fund's expected payments. In setting the valuation interest, IAS 19 requires a reference be made to the yield on Government Bonds (since there is no deep market for Nigeria corporate bonds) at the balance sheet date. Hence, a decrease in yield on the Government Bonds will lead to a decrease in discount rate and in turn an increase in the Fund's liability, however this may be partly offset by the corresponding increase in the Bonds component of the portfolio backing the Fund.

Sensitivity analysis for pension

Notes to the Consolidated and Separate Financial Statements

For the year ended 31 December 2023

NLNG project financing

In October 2019, Nigerian National Petroleum Company ("NNPC") entered into a new agreement with NLNG on behalf of NNPC E&P Limited, through its equity holdings in Nigeria Agip Oil Company (NAOC), Shell Petroleum Development Company (SPDC) & Total Exploration & Production Nigeria Limited (TEPNG) JV's, to provide incremental gas supply to Nigerian Liquified Natural Gas (NLNG) Feedstock and in return, NLNG being the buyer would provide an advance cash call payment (CAPEX Portion) of some selected 'Projects' as identified in the agreement. NLNG is to recover its funding as provided by the agreement when gas supply is made to it by the Seller (NNPC).

The agreed external financing amount is US \$2.4 billion with duration of twelve (12) years as contained in the external financing agreement. Of the ₹1.08 trillion (US\$2.4 billion), ₹224.9 billion (US \$501.6 million) is available to NEPL for the NOAC JV projects while the remaining balance is available to the other two JV Partners. As at 31 December 2023, NEPL through the NAOC JV has drawn ₹294.8 billion (US \$325 million) and NLNG has so far recovered ₹207.7 billion (US \$229 million) of it. The prepayment is available to each seller by the buver (NLNG) from time to time as the seller requests for it.

Eagle project financing

Nigerian National Petroleum Company ("NNPC") (parent company of NNPC E&P Limited ("NEPL") formerly Nigerian Petroleum Development Company Limited ("NPDC")) entered into a Forward Sale Agreement (FSA) with Eagle Export Funding Limited for the sale of NEPL's future crude oil productions to provide funds to be used by NEPL to settle part of it's obligations to the Federal Inland Revenue Service as well as other corporate purposes.

Arising from the above agreement, Eagle Export Funding Limited which is an orphan special purpose vehicle incorporated in the Bahamas ("SPV" or "Eagle") has obtained funds from third party lenders secured on NEPL's future oil production.

The payment received is required to be settled (together with payment of fees, transaction costs and interest expense) with delivery of crude oil volumes. There was no upfront payment for crude oil received by NEPL's during the year ended 31 December 2023 (31 December 2022:Nil)

The production under the FSA will support debt of up to \$627.8 billion (US \$1.5 billion), which has been structured as a crude oil prepayment facility over two tranches.

Significant changes in contract liabilities

There was a net decrease in contract liabilities by ₹460.8 billion (2022 - increase - ₹77.2 billion) due to the funds received in advance of delivery of products under the above-described arrangements.

		163,728,771	25,032,633	134,615,937	10,056,762	

38.1 Terms and conditions of the above financial liabilities:

Trade payables are non-interest bearing and are normally settled within 45-day terms.

Payables to Federal Government of Nigeria are non-interest bearing and are normally settled within 90 days.

Payables to related parties are non-interest bearing and are normally settled within 30 days.

Other payables are non-interest bearing and have an average term of six months.

38.2 Stock overlift, underlift and gain/loss on stock valuation

Stock overlifts are excess crude lifted above the share of production. It usually exist when the crude oil lifted by the Group during the period is above its ownership share of production.

Stock underlift arises when the Group does not take its entire share of production in a period.

Loan to a subsidiary

A loan of N53.33 billion was granted to NNPC Energy Services Limited by NNPC Limited for the purpose of Keana drilling campaign, Chad Basin re-entry as well as other 3D Seismic acquisition projects.

The loan was effective on 16 October 2023 with interest accruing at a rate of 13.85% Prime Lending Rate (PLR) for naira portion of the loan and 4.43% (30-Day Average SOFR) plus a margin of 5.5% for the dollar portion of the loan. The loan repayment is expected over a 3-year period. Interest of N1.69 billion has been paid on the loan, however, principial repayment has not started.

Terms and conditions of transactions with related parties

The transactions with related parties are made at terms equivalent to those that prevail in arm's length transactions. Outstanding balances at the year end are unsecured and interest free.

Commitments with related parties

Nigerian National Petroleum Company Limited ("NNPCL") is the parent company. The Company supplies crude oil to NNPC Trading SA and also supplies petroleum products to PPMC and NNPC Retail Limited for sale to marketers and end users respectively.

44 Events after the reporting period

(a) Commencement of Oil production in OML 13

One of the subsidiaries within the Group, NEPL and Natural Oilfield Services Ltd (NOSL), a subsidiary of Sterling Oil Exploration & Energy Production Company Ltd (SEPCO), announced the successful commencement of oil production at OML 13 in Akwa Ibom State, Nigeria. The production commenced on May 6th, 2024 with 6,000 barrels of oil and is expected to be ramped up to 40,000 barrels per day by May 27th, 2024.

(b) Reconciliation of receivables due from federation and payables due to Federation

A committee for stakeholder alignment was established to reconcile the amounts owed and owing between NNPC and pertinent government agencies such as the Nigeria Upstream Petroleum Regulatory Commission (NUPRC). On April 23rd 2024, a finalized report was issued on the Federation Reconciliation between the relevant government agencies and NNPC. One of the points covered in the finalised report concerns the outstanding receivable balance from federation such as Okpai receivables on power sales will be utilized to offset federation payables such as royalties, Petroleum Profit Taxes (PPT), Companies Income Taxes (CIT), Value Added Taxes (VAT) and Withholding Taxes (WHT).

There were no other events after the reporting date of 31 December 2023 that could have had a material effect on the financial statements that have not been provided for or disclosed.

Notes to the Consolidated and Separate Financial Statements

For the year ended 31 December 2023

46 Legal claim contingency

A provision has been made in the Financial Statements for contingent liabilities for lawsuits against the Group estimated at N18.14billion. The contingent liabilities are based on confirmations received from the Company's external legal counsels.

Furthermore, the Group has also been advised by its legal counsel that it is only possible, but not probable that action will succeed for some lawsuits against the Group which are pending in various courts estimated at N620.24billion. Accordingly, no provision has been made in the financial statements for contingent liabilities in respect of these lawsuits.

47 Commitments and contingencies

Capital commitments

i Pre-export financing

One of the subsidiaries within the Group, NNPC Exploration & Production Limited (NEPL) had capital commitments of \$159million (N60.3billion as at the accounting year end 2020). This related to the settlement of pre-export finance loans (PXF1 and PXF2) obtained by NNPC for the settlement of debts owed by the NNPC Group to some import vendors of petroleum products.

As at 31 December 2023, there are no capital commitments regarding pre-export financing as outstanding PXF 2 liability balance was refinanced through a forward sale of crude valued at \$694m (N278billion) to Eagle Export Limited tagged "Project Eagle Subsequent" on 15 March 2021.

ii Eagle Exporting

One of the subsidiaries within the Group, NNPC Exploration & Production Limited (NEPL) had capital commitments of \$352.88 million (\$158.3 billion) as at 31 December 2023. This relates to the forward sale agreement with Eagle Export Financing Limited for the delivery of Crude Oil. Under the contract, Eagle Export Funding limited will make an upfront payment to NEPL for crude in a Forward Sale Agreement (FSA). The payment received is required to be settled with delivery of crude oil volumes i.e. NEPL sells crude to Eagle Export Funding Limited based on a delivery schedule.

Based on the agreement, at least 1,800,000 barrels of Crude Oil must be nominated and scheduled by NEPL (and delivered at the relevant delivery Terminal to Eagle Export Limited in every delivery period which commenced on 28 August 2020.

iii NLNG third party financing

One of the subsidiaries within the Group, NNPC Exploration & Production Limited (NEPL) had capital commitments of US \$96.36 million (\text{\text{\text{\text{NS}}}} 4.1 billion) as at 31 December 2023 (31 December 2022: US \$109.78 million (\text{\text{\text{\text{\text{\text{NS}}}}} 4.9 29 billion). This relates to the Incremental gas supply agreement between NNPC/NEPL and NLNG in which NLNG train 1 - train 6 (T1-6) is required to avail NEPL with a total of USD \$501.6 million (\text{\text{\text{\text{\text{NS}}}}} 4.99 billion) for the purchase of gas for a period of 12 years.

Under the agreement, Nigerian National Petroleum Company Limited ("NNPC Limited") in October 2019, entered into a new agreement with NLNG on behalf of NEPL, through its equity holdings in NAOC, SPDC & TEPNG JOA's, to provide Incremental Gas Supply to NLNG T1-6 Feedstock and in return, NLNG being the buyer would provide an advance cash call payment (CAPEX Portion) of some selected 'Projects' as identified in the agreement. NLNG is to recover their funding as provided by the agreement when Gas Supply is made to them by the Seller (NNPC Limited).

iv Project Brogue: Acquisition of Chevron Nigeria 40% Interest in OML 86 and 88

NNPC E&P Limited through Nigerian National Petroleum Company Limited ("NNPCL") exercised its pre-emption right to acquire Chevron Nigeria Limited ("CNL") 40% interests in OMLs 86 & 88 "the Asset" at a price of US \$250 million (\pm 112.13 billion). NNPC E&P Limited paid the total price for the asset and concluded the acquisition of the equity share (40%) in OML 86/88 on 1 July 2022

To finance this, the sum of US \$300m (\\$124 billion) was raised through forward sale agreement with Bestaf to fund the acquisition through Project Brogue and as at 31 December 2023, US \$218.30 million has been paid back. Hence, NEPL has a capital commitment to Middleton Funding Limited as at 31 December 2022 amounting to US \$81.7 million.

v OML 13 Funding and Technical Service Agreement - FTSA

One of the subsidiaries within the Group, NEPL executed an FTSA valued US \$3.2 billion (*1.4 trillion) with Sterling Oil Exploration and Energy Production Company Ltd (SEEPCO) for the development of OML 13 in 2020. The first and only drawdown of US \$365,384 (*331.44 billion) was achieved in May 2022. Hence, as at 31 December 2023, NEPL has a capital commitment of US \$365,384 (*331.44 million).

vi OML 42 Funding and Technical Service Agreement - FTSA

One of the subsidiaries within the Group, NEPL, on behalf of OML 42 JOA executed an FTSA valued US \$1.95 billion with Amaranta Group in 2021. This is for the settlement of outstanding legacy bills and further development of the JOA asset. As at 31 December 2023, NEPL has Capital commitment of US \$17.8 million (\frac{1}{2}16.15 billion).

Notes to the Consolidated and Separate Financial Statements

For the year ended 31 December 2023

vii OML 11 Funding and Technical Service Agreement - FTSA

One of the subsidiaries within the Group, NEPLexecuted an FTSA valued US \$3.4 billion (\text{\titillitint{\texitex{\texi{\text{\texitex{\text{\text{\texitet{\text{\texi}\text{\text{\texi{\text{\texit{\text{\tet

viii Financing of investment in Dangote Refinery

In September 2021, NNPC Limited proposed to acquire 20% interest in Dangote Petroleum Refinery and Petrochemicals Free Zone Enterprise (DPRP FZE) worth \$2.76 billion which was financed by a forward sale agreement of \$1.036 billion from Lekki Refinery Funding Limited of which \$1 billion was paid to Dangote Petroleum Refinery and Petrochemicals Free Zone Enterprise (DPRP FZE).

This investment was initially held by NNPC Greenfield Limited (a special purpose vehicle 100% owned by NNPC) in trust for NNPC Limited. Due to restructuring of the NNPC Limited Post PIA era, the function of this unit has been moved to NNPC Downstream Investment Service (NDIS). The balance of the cost of equity investments made in DPRP FZE, which is USD1.76 billion has been agreed to be paid in cash instead of the proposed crude discount of a \$2.5/bbl. on the official selling price of crude oil.

As at December 31, 2023, NNPC Limited holds a 7.25% interest in DPRP FZE.

ix Project Bison

In September 2021, NNPC entered into a forward sale agreement with Lekki Refinery Funding Limited to supply 35,000 bbl. of crude oil per day for the settlement of the \$1.036 billion (N426.2 billion) funding received for the financing of investment in Dangote Refinery. The interest rate for the facility is 3-month libor plus 6.125%. As at 31st December 2023, NNPC limited has paid \$625 million principal, while \$424 million (N 324 Billion) is still outstanding.

x Project Gazelle

In December 2023, NNPC Limited entered into a forward sale agreement with Project Gazelle Funding Limited to supply 90,000 bbl. of crude oil per day from PSC Assets for the settlement of a \$3 billion funding. The funding was utilised by the company to finance an advance payment of future taxes and royalty obligation due to the federation on PSC assets managed by the company on behalf of the federation.

As at 31st December 2023, a drawdown of \$2.25 Billion has been achieved from the initial facility of \$3 billion. The interest rate for the facility is 3-month libor plus 6.5% while the margin and Liquidity Premium are 6% and 0.5% respectively. Principal repayment is expected to commence in June 2024.

48 Financial risk management objectives and policies

The Group is exposed to market risk, credit risk and liquidity risk. The Group's senior management oversees the management of these risks. The Group's senior management is supported by the Group finance committee that advises on financial risks and the appropriate financial risk governance in line with the Group policies framework. The financial risks are identified, measured and managed in accordance with Group policies framework. This is to ensure that the financial risks affecting the Group operations are maintained at the level of the Group risk appetite. The Group finance committee is a team made up of specialists that have the appropriate skills, experience and supervision.

The Board of Directors review and agree the policies for managing financial risks of NNPC. The risks are summarized below.

48.1.1 Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprise four types of risk: interest rate risk, currency risk, commodity price risk and other price risk, such as equity price risk. The Group's financial instruments affected by market risk include: lease obligations, receivables and payables denominated in foreign currencies, short term deposits and financial assets at FVTOCI.

48.1.2 Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group manages its interest rate risk by funding its operations mostly through its equity. The Group's policy is to keep borrowing cost to its barest minimum. To manage this, the Group rarely borrows.

The table below shows the Group's exposure to interest rate risk.

Note 26

2022		3,843 (3,843)	5% -5%	-

48.1.3 Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Group's exposure to the risk of changes in foreign exchange rates relates primarily to the Group's operating activities (when revenue or expense is denominated in a different currency - Nigerian Naira and Pound Sterling- from the Company's functional currency) and the Group's net investments in foreign subsidiaries. The Group has set up a policy requiring the management of foreign exchange risk against the functional currency. The Subsidiaries are required to manage their entire foreign exchange risk exposure with the Group finance committee. To manage their foreign exchange risk arising from future commercial transactions and recognized assets and liabilities, each entity within the Group seeks to ensure contracting in their own functional currency.

The following are the financial instruments of the group that are exposed to foreign currency risk.

	Group		Company	
	31 December	31 December	31 December	31 December

		N'M		N'M
31-Dec-22	20%	274	20%	321
	-20%	(274)	-20%	(321)

The movement on the before-tax effect is a result of a change in monetary assets and liabilities denominated in Nigerian Naira and Pounds Sterling, where the functional currency of the entity is a currency other than Nigerian Naira and Pounds Sterling.

48.1.5 Commodity price risk

Although the group does not have any financial instruments that is exposed to commodity price risk the group is affected by the volatility of certain commodities. Its operating activities involve the sale of crude oil and other allied products.

48.1.6 Commodity price sensitivity

The following table shows the effect of price changes for crude oil, gas and power prices.

	Change in crude oil price	The Group Effect on profit before tax N'M	The Company Effect on profit before tax N'M
31 December 2023	6% -6%	1,439,403 (1,439,403)	487,889 (487,889)
	,	The Group	The Company

	_	Effect on profit before	
	Change in	Effect on	Effect on

Equity price risk

The Group's quoted equity securities are susceptible to market-price risk arising from uncertainties about future values of the investment securities. Reports on the equity portfolio are submitted to the Group's senior management on a regular basis which is managed and controlled by the Group finance committee. The Group's Board of Directors reviews and approves all equity investment decisions.

Equity price sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in the value of the securities and its impact on the Group's other comprehensive income.

Nigerian National Petroleum Company Limited NNPC Notes to the Consolidated and Separate Financial Statements For the year ended 31 December 2023

	-4%	(18,856)	-4%	(18,856)

48.1.7 Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from clients and related parties. The Group is exposed to credit risk from its operating activities (primarily for trade receivables) and from its financing activities, including deposits with banks and financial institutions and committed transactions.

48.2 Impairment of financial assets

Customer credit risk is managed by each business unit subject to the Group's established policy, procedures and control relating to customer credit risk management. Credit quality of the customer is assessed based on credit rating scorecard and individual credit limits are defined in accordance with this assessment. Outstanding customer receivables are regularly monitored and any shipments to major customers are generally covered by letters of credit or other forms of credit insurance. The Group assesses the credit quality of the customers, taking into account its financial position, past experience and other factors.

The requirement for an impairment is analysed at each reporting date on an individual basis for major clients. Additionally, a large number of minor receivables are grouped into homogenous groups and assessed for impairment collectively. The calculation is based on actual incurred historical data adjusted by forward looking information. The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial assets, as shown below. The Group does not hold collateral as security.

Maximum exposure to credit risk

i. Measuring impairment loss

The Group has five types of financial assets (Company: six) that are subject to IFRS 9's new expected credit loss model. The details of the Group's impairment are detailed below:

- a)Trade receivables
- b)Other receivables
- c)Related parties receivables (Company only)
- d)Receivable from Federal government of Nigeria
- e)Staff loan
- f)Cash and short term deposits

Nigerian National Petroleum Company Limited NOTES to the Consolidated and Separate Financial Statements For the year ended 31 December 2023

Simplified approach:

The Group performs an impairment analysis on Trade receivables and Other receivables using the provisional matrix to measure expected credit losses. The provision rates are based on days past due for groupings of various customer segments with similar loss patterns. The calculation reflects the probability weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions. Generally, trade receivables are written-off if past due for more than one year and are not subject to enforcement activity.

General approach:

The Group measures impairment on Related parties receivables and Cash and short term deposits using the General approach. The parameters used to determine impairment for Related parties receivables, receivables from Federal Government, staff loans, cash and short-term deposits are shown below. For all balances presented in the table, the respective 12-month Probability of Default (PD) equates the Lifetime PD for stage 2 as the maximum contractual period over which the Group is exposed to credit risk arising from the balance is

	Probability	Probability of	Loss Given	Exposure at	Macroeconomic

		100%.	bonds.		

Stage 1: This stage includes financial assets that are less than 30 days past due (Performing).

Stage 2: This stage includes financial assets that have been assessed to have experienced a significant increase in credit risk using the days past due criteria (i.e. the outstanding receivables amounts are more than 30 days past due but less than 90 days past due) and other qualitative indicators such as the increase in political risk concerns or other micro-economic factors and the risk of legal action, sanction or other regulatory penalties that may impair future financial performance.

Stage 3: This stage includes financial assets that have been assessed as being in default (i.e. receivables that are more than 90 days past due) or that have a clear indication that the imposition of financial or legal penalties and/or sanctions will make the full recovery of indebtedness highly improbable.

The reconciliation of impairment on financial assets is shown below;

a Trade receivables

The Group applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for trade receivables. Trade receivables represent the amount of receivable from customers for the sale of the products and provision of services. The expected credit loss rate for this receivable is determined using a provision matrix approach.

The provision matrix approach is based on the historical credit loss experience observed according to the behaviour of customers over the expected life of the receivable and adjusted for forward-looking estimates of relevant macroeconomic variables.

The expected loss rate was calculated as the percentage of the receivable that is deemed uncollectible during a particular period. The expected loss rates as at 31 December 2023 are as follows:

Group		31	December 2023		
	0-30	31-60	61-90	More than 90	Total

b Other receivables

The Group applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for other receivables.

Other receivables include sundry receivables.

The expected credit loss rate for this receivable is determined using a provision matrix. The provision matrix used is based on the Group's historical default rates observed over the expected life of the receivable and is adjusted for forward-looking estimates.

An expected loss rate was calculated as the percentage of the receivable that is deemed uncollectible during a particular period. The expected loss rates as at 31 December 2023 are:

Group		31 Dec	cember 2023

At 31 December	876,932	567,991	180,477	6,376	

c Related parties receivables

The Group applies the IFRS 9 general model for measuring expected credit losses (ECL) which uses a three-stage approach in recognising the expected loss allowance for related parties and other receivables. Receivables from related parties represents amount due to the Company from related strategic business units (SBU's). All the subsidiaries have been assessed to have uniform credit qualities. The credit qualities takes into account its financial position, past experience and other factors.

The ECL recognised for the period is a probability-weighted estimate of credit losses discounted at the effective interest rate of the financial asset. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive).

The following analysis provides further detail about the calculation of ECLs related to these assets. The Group considers the model and the assumptions used in calculating these ECLs as key sources of estimation uncertainty.

d Receivable from Federal Government of Nigeria

The Group applies the IFRS 9 general model for measuring expected credit losses (ECL) which uses a three-stage approach in recognising the expected loss allowance for FGN receivables. Receivables from FGN represent the outstanding payments due to the Group from the Federal Government of Nigeria. The receivable has been assessed for impairment and has remained in stage 1. From the computation, impairment on the receivable is deemed immaterial and has not been recognised.

e Staff loans

The Group applies the IFRS 9 general model for measuring expected credit losses (ECL) which uses a three-stage approach in recognising the expected loss allowance for Staff loans. Staff loans represent the outstanding balances due from loans given to staff. The loan has been assessed for impairment and has remained in stage 1. From the computation, impairment on the receivable is deemed immaterial and has not been recognised.

f Other cash and bank balances

The Group applies the IFRS 9 general model for measuring expected credit losses (ECL) which uses a three-stage approach in recognising the expected loss allowance for Bank balances and other short term deposits. Bank balances and short term deposits represents the amount of cash balances domiciled in the Group's various Banks including fixed deposits. All the other cash ad bank balances have been assessed to have uniform credit qualities.

The ECL recognised for the period is a probability-weighted estimate of credit losses discounted at the effective interest rate of the financial asset. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive).

The following analysis provides further detail about the calculation of ECLs related to these assets. The Group considers the model and the assumptions used in calculating these ECLs as key sources of estimation uncertainty.

ii Financial instruments and cash deposits

Credit risk from balances with banks and financial institutions is managed by the Group's Treasury Department in accordance with the Group's policy. Investments of surplus funds are made only with approved counterparties and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by the Group's Board of Directors on an annual basis, and may be updated throughout the year subject to approval of the Group's finance committee. The limits are set to minimize the concentration of risks and therefore mitigate financial loss through potential counterparty's failure to make payments. The Group's maximum exposure to credit risk for the components of the statement of financial position is the carrying amounts as shown above.

iii Excessive risk concentration

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Group's performance to developments affecting a particular industry. In order to avoid excessive concentrations of risk, the Group's policies and procedures include specific guidelines to focus on the maintenance of a diversified portfolio to dilute potential concentration of risks. The Group also ensures that concentrations of credit risks are identified early enough, controlled and managed accordingly.

48.3 Estimation uncertainty in measuring impairment loss

The table below shows information on the sensitivity of the carrying amounts of the Group's financial assets to the methods, assumptions and estimates used in calculating impairment losses on those financial assets at the end of the reporting period. These methods, assumptions and estimates have a significant risk of causing material adjustments to the carrying amounts of the Group's financial assets.

a. Expected cashflow recoverable

The table below demonstrates the sensitivity of the Group's profit before tax to a 10% change in the expected cashflows from financial assets, with all other variables held constant:

	Group Effect on profit before tax		Company Effect on profit before tax	
	31 December	31 December	31 December	31 December
	2023	2022	2023	2022
	N'M	N'M	N'M	N'M
Increase/decrease in estimated cash flows +10% -10%	17,041,509	2,139,634	14,174,026	1,277,667
	(17,041,509)	(2,139,634)	(14,174,026)	(1,277,667)

b. Significant unobservable inputs

The table below demonstrates the sensitivity of the Group's profit before tax to movements in the loss given default (LGD) for financial assets, with all other variables held constant:

		Group Effect on profit before tax		oany it before tax
	31 December 2023 N'M	31 December 2022 N'M	31 December 2023 N'M	31 December 2022 N'M

NOTES to the Consolidated and Separate Financial Statements

For the year ended 31 December 2023

48.4 Liquidity risk

The Group monitors its risk to shortage of funds using a liquidity planning strategy. The Group's objective is to maintain a balance between continuity of equity funding and flexibility through the use of trade and other payables. The Group's policy is to maintain below 1% borrowings and this explains why the Group has no debt in its equity structure. The Group assesses the concentration risk as fairly good as funding is sufficiently available from its shareholders. The Group is only significantly exposed to liquidity risk through its trade and other payables, lease liabilities and royalties payable.

The table below summarizes the maturity profile of the Group's financial liabilities based on contractual undiscounted payments.

Group

Year ended 31 December 2023	Below 1 year	1-2 years	Above 2 years	Total
	N'M	N'M	N'M	N'M
Trade and other payables** Lease liabilities	163,308,438 401,025	-	-	163,308,438 401,025

^{*}Trade and other receivables exclude VAT receivables and advance payments.

48.6 Fair value hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique: Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or

Level 3: techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data.

As at 31 December 2023, the Group held the following financial instruments measured at fair value:

Group and the Company Group		ıp	Company			
			31 December	31 December	31 December	31 December
			2023 FVTOCI	2022 FVTOCI	2023 FVTOCI	2022 FVTOCI
	Number of					
Quoted equity sh	shares	r value hierarchy	N'M	N'M	N'M	N'M
First Bank of Nigeria Holdings	279,864,073	Level 1	9,845	1,914	9,710	1,913
Nestle	11,469	Level 1	25	25	25	25
Cadbury	1,599	Level 1	-	-	-	-
Unilever	8,138	Level 1	-	-	-	-
Nigerian-German	5,337	Level 1				
Chemical			-	-	-	-
Schlumberger	45,900	Level 1	2,032	2,226	2,167	2,226
			11,902	4,165	11,902	4,164

The fair value of the quoted equity instrument has been determined using the price quote on the Nigeria Stock Exchange (NSE) market as at the year end.

		_	Group		Company		
			31 December	31 December	31 December	31 December	
Unquoted	Number of	Fair value	2023	2022	2023	2022	
equity shares	shares	hierarchy	N'M	N'M	N'M	N'M	
Dangote Oil Refining Company	2,249 y	Level 3	1,081,862	421,318	1,081,862	421,318	
Afrexim Bank	72,464	Level 3	135,604	45,913	135,605	45,913	
			1,217,466	467,231	1,217,467	467,231	

During the reporting year ended 31 December 2023, there were no transfers between Level 1, Level 2 and Level 3 fair value measurements.

^{**}Trade and other payables (excludes non-financial liabilities such as provisions, accruals, taxes, pension and other non-contractual payables), trade and other receivables (excluding prepayments) and cash and short-term deposits are financial instruments whose carrying amounts as per the financial statements approximate their fair values. This is mainly due to their short term nature.

NNPC Notes to the Consolidated and Separate Financial Statements

For the year ended 31 December 2023

49 Details of professionals that provided services to Company during the period

(a) Details of professionals that provided services during the period:

Name of professional firm	Summary of services provided	Name of professional	FRCN Number
Ernst and Young (EY)	Actuarial valuation service	Miller Kingsley	FRC/2012/NAS/000 0002392
Ernst and Young (EY)	IFRS 9, 15 and 16 assessment	Samuel Agbevem	FRC/2020/002/000 00020538
Phillips Oyedele & Co and Mctresl Consulting	Valuation of NNPC Investments in Dangote Oil Refinery and AFREXIM Bank Limited	Phillips Oyedele	FRC/2019/ICAN/000 00019742
Ernst and Young (EY)	Goodwill impairment Assessment of Nueoil Energy Limited as at 31st December 2023	Olufemi Alabi	FRC/2021/004/0000 0024748

(b) Details of non-audit services provided by joint external auditors to the Company during the year are below:

There were no non-audit services provided by joint external auditors to the Company during the period.

50 Capital management

Capital includes equity attributable to the equity holders of the parent. The primary objective of the Group's capital management is to ensure that it maintains a strong credit rating and healthy capital ratios in order to support its business and maximize stakeholder value.

The Group manages its capital structure in light of changes in economic conditions.

The Group monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt. The Group includes within net debt trade and other payables, lease liabilities less cash and cash equivalents.
