

## **NNPC Limited - Suppliers Summit**

### **Theme: Reshaping the Future of Procurement and Supplier Management**

As part of NNPC Ltd.'s Digital Strategy, which seeks to enhance business capabilities, maximize competitiveness and drive better performance, the NNPC procurement organization will be transiting to a cloud-based procurement system on SAP Ariba Network effective 1st January, 2025.

This remarkable step will bring our esteemed vendors in touch with contracting opportunities on the NNPC Ariba Platform, a secure and exclusive marketplace tailored for end-to-end procurement of goods and services.

We are confident that this enablement will further enhance the petroleum industry contracting cycle efficiency and reduce costs in line with the Presidential Directive on Reduction of Petroleum Sector Contracting Costs and Timelines, 2024.

Going forward, all stages of procurement including issuance of RFQs/RFPs, submission and evaluation of bids, contract negotiations, issuance of Purchase Orders, and processing of invoices will all happen on the NNPC Ariba platform.

This will enhance our suppliers' experience, minimize human interface, improve process transparency while fostering collaboration and best practice.

To achieve a smooth cutover by 1st January, 2025, we are involving our esteemed suppliers to be part of this journey from its onset.

You are therefore invited to the NNPC Ltd. Suppliers Summit which will be held on **3rd December, 2024**, during which participants will be made to understand the following key processes:

- Registering and creation of supplier profile on NNPC Ariba platform
- Navigating the functionalities of the platform, procurement workflows and timelines.
- Best practices for successful collaboration with NNPC Limited

Please visit <https://tinyurl.com/supplier-summit> to join or send your inquiries to [nnpccariba@nnpcgroup.com](mailto:nnpccariba@nnpcgroup.com) or call **+2347007006672** (10am to 4pm).

Thank you for your interest in doing business with NNPC.

Uzoma M. Emelife  
Chief Supply Chain Officer
